Introduction

E take pleasure in submitting to our patrons and friends this catalogue containing all the standard Novelties as well as a general collection of plants of every description, and trust that you will kindly peruse the pages of this catalogue and will favor us with your orders for whatever you need in the Horticultural line, which we are fully

equipped to supply with the best stock only.

We have endeavored to give truthful descriptions, while the illustrations which are used are all taken either from our stock on our place, or work that we have actually done; there is no borrowed material whatsoever.

We beg to draw special attention to our new and rare plants, especially our

seedling Dahlias which have proved to be the finest in cultivation.

We would ask our patrons to place their orders as early as possible, before the stock, especially in the new plants, will be exhausted.

Personal Introduction

By the way of introduction, wish to state that the present firm was established in 1894, by W. A. Manda, as The Universal Horticultural Establishment, and has been carried on ever since under the same direction and policy, with the exception that the business extended so fast that it was incorporated in 1903.

Previous to this, Mr. Manda was managing portner of Pitcher & Manda, having severed his

connection and started in 1894 on his own account.

Before meeting Mr. Pitcher, Mr. Manda was curator of the Botanical Gardens of Harvard University for five years. This, with the previous extensive experience in all the leading horticultural countries in Europe, has brought this firm second to none in America, which is well attested by the numerous honors and prizes received during his career.

The real taste of Superiority is shown in open competitions in which I have taken, in the last twenty-five years, thousands of prizes, consisting of Cups, Mcdals, Diplomas, Certificates and

Money Prizes.

In six of the leading horticultural events of the world, I achieved the following: The International Horticultural Exhibition in Hamburg, Germany, in 1897, 14 prizes.

The First International Exhibition in Chicago, Ill., 1908, 65 prizes. The Second International Exhibition in Boston, Mass., in 1911, 89 prizes.

The Great Royal International Horticultural Exhibition in London, in 1912, 24 prizes. The Great Third International Horticultural Exhibition in New York, Grand Challenge Cup, three Silver Cups, four Gold Medals, fifteen Silver Medals, five Bronze Medals.

One thousand one hundred and fifty-six dollars in cash. A world's record—97 prizes. Great International Exhibition in Ghent, Belgium, 1913, 30 Medals.

This in competition with the whole world, which needs no further comment.

Mr. Manda is interested in everything pertaining to Horticulture, which is well exemplified, being an honorary, active or life member in nearly all the well-known Horticultural or Scientific organizations both in America and abroad.

Terms Upon Which We Do Business

ALL correspondence pertaining to the business should be addressed to the firm and not to any of the employees.

All accounts are rendered monthly. Our patrons are requested to remit by checks, express or post office money-orders, or currency in registered letters. We will not be responsible for money sent in unregistered letters. From unknown correspondents either a remittance or reference is required with each order.

We send goods C.O.D. when the order is accompanied by a remittance of at least 25 per cent. of its total value. This guarantees acceptance of goods upon arrival at destination.

We do not guarantee delivery or safe carriage of goods. After the goods are delivered to the Transportation Company in good condition, and receipted for by them, our responsibility ceases, as they are beyond our control, and become the property of the purchaser.

Packing. All packing is charged for at cost.

Complaints. Any complaints arising should be made within 3 days after receipt of the goods, otherwise they cannot be considered.

Early orders. Orders are solicited at as early a date as possible, that we may have ample time for their execution. Please write plainly, name, post office, express office and any other necessary information as to the best method of forwarding; express is recommended.

Non-Warranty. Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather and soil conditions, too deep or too shallow planting, etc., which render it impossible for us to guarantee success. Although we take all possible care to supply only such stock as will, under proper conditions, produce satisfactory results, we still give no warranty as to description, quality or productiveness of any of the seeds, plants, bulbs, or any other goods we send out, and we will not be in any way responsible for the crop or results, also if stock is exhausted when orders are filled, or anything in or beyond our control, and every order will only be accepted on these conditions.

Orders placed and accepted cannot be cancelled except with our consent.

Visit Our Nurseries

The nurseries are situated on the D., L. & W. R. R., adjoining the depot at South Orange. There are 100 trains daily, so visitors will only have a few minutes to wait, trains being so frequent. There are also electric cars from Newark to South Orange Depot, connecting with the Pennsylvania R. R. and Jersey Central R. R. every ten minutes. Also from Orange to South Orange, connecting with the Erie R. R. Taking it all in all, it is the most accessible nursery in the country.

New Dahlia Bohemian Garnet (Manda). (See opposite page.)

One of the set of six Prize Winners. Bulbs \$1.50 each; green plants \$1.00 each; the set of 6 varieties, one bulb of each, \$8.00.

New Dahlias for 1916.

Supplementing last year's introduction of our new Dahlias, we are distributing this year, for the first time the five following fine varieties, which with the former set of last year, is perhaps the finest collection of Dahlias in cultivation.

This has been proven by the actual fact that alone with these twelve varieties we have carried at the National Dahlia Show in New York against thousands of existing varieties first prize for the largest Dahlia on exhibition, with Albert Manda. First prize for the finest twelve bloom, one variety with Mrs. A. I. duPont. First prize with collection of eight varieties, three of each with selection from our varieties exclusively, and first prize for six varieties, six of each selected from our varieties exclusively. This is the convincing proof of their superiority over any existing kind.

proof of their superiority over any existing kind.

Mrs. W. L. Austin (Manda). The most distinct color decorative variety in cultivation.

The plant is of a very strong habit with stout upright stems supporting large perfectly double flowers of the deepest salmon orange glistening color. Grand variety for any purpose.

Bohemian Garnet (Manda). Grand decorative variety producing double extra large flowers on long stout stems. The color is of the richest red maroon imaginable. Grand variety for exhibition purposes as well as a garden plant.

Joseph Ehrlich (Manda). Decorative variety of a most striking color approaching to real blue. Flowers are of good size, perfectly double; the purple blue color makes this a very desirable variety either as a garden plant or for exhibition purposes.

White Perfection (Manda). Show type of Dahlia, large well formed flower of white daintily shaded with light pink. Plant has a fine sturdy habit, good foliage and stout upright flower stone. Very floriferous and useful variety for any purpose.

flower stems. Very floriferous and useful variety for any purpose.

Frank Manda (Manda). Decorative variety of sterling merit both as a plant or for cut flowers. Of dwarf sturdy growth, the plant sends out innumerable long stems carrying medium sized well formed flowers of the richest scarlet color. The flowers last for a long time in perfection, and as many as four flowers will be open at one time on a single stem. This variety should be in every collection.

Albert Manda (Manda). At the urgent request of a great many people seeing this Dahlia, we were obliged to send out a limited number of roots and plants last year, although the full dissemination is being sent out this year.

This is the largest flowering Dahlia in cultivation with fine light green ample foliage, very stout stems which terminate into extraordinary flowers nearly a foot in diameter with beautiful shades of lemon, white and pink, the color varying according to the season, exposure and situation. It is one of the most extraordinary Dahlias ever raised and a forerunner of a new race.

Various New Plants for 1916

Peperomia (Pericati (Manda). Fine greenhouse plant with roundish thick leaves, bright green, shiny, with spikes of whitish flowers. Fine addition to any collection. 50c. each; \$5.00 per dozen.

Kalanchoe Mandaiana (Manda). An African introduction. The leaves are thick. white, covered with white farina; stems leafy; 1 to 2 ft. high; producing a cluster of pale yellow flowers lasting long in perfection. A fine greenhouse flowering plant. Price \$1.00 each; \$10.00 per dozen.

Canna Firebird. One of the finest varieties with large green leaves, large trusses of glistening scarlet. The individual flowers are large and stand well. Price 50c. each; \$5.00 per dozen.

Canna Yellow King Humbert. Has all the good qualities of this grand Canna, while the flowers are bright yellow. Price 50c. each; \$5.00 per dozen.

Magnolia Salicifolia. New Japanese hardy variety with graceful branches clothed with long narrow leaves and quantities of white flowers that are very fragrant, as are also the leaves and back. as are also the leaves and bark. A gem that should be in every collection. Price \$2.50 to \$5.00 each.

Magnolia Watsonii. Grand species with white cup shaped flowers and dark center.

Very desirable. \$2.00 to \$3.00 each.

Magnolia Parviflora. Rare and beautiful shrub with medium sized flowers of good substance and white color. Should be largely grown. Price \$2.00 to \$3.00 each.

Serissa foetido. Hard wooded greenhouse shrub 2 to 4 ft. high with small roundish leaves and covered in Spring with multitude of white flowers not unlike a Kalmia. Welcome addition to our Spring flowering greenhouse plants, especially for Easter flowering.

ring. Price \$1.00 each; \$10.00 per dozen.

Fuchsia triphylla hybrids. We have sent out these plants some time ago, but now we are fortunate to have a fine stock of good strong plants of this perpetual blooming beautiful variety with its bright colored red flower that could be used for almost any purpose, but especially for tubs and vases for summer flowering, for which purpose it would flower the entire summer and produce a blaze of color not obtained by other plants. Strong 2-year-old plants, 75c. each; strong 3-year-old plants, \$1.00 each; specimens, 10 and 12-inch pans, \$3.50 each.

KENTIA.

This most valuable decorative Palm in cultivation we have made a specialty of, and now have over thirty distinct varieties of same. They are fine plants growing into beautiful specimens and are from two to eight feet high. We would be pleased to make special offer to intending purchasers.

NEPHROLEPIS.

This plant has recently developed into so many forms and varieties that we now have in our collection fifty-four distinct kinds. We have all these in stock in either ordinary sized plants or specimens, and would be pleased to supply same at 25 to 50c each or in collection of six distinct varieties for \$1.50; collection of twelve distinct varieties for \$3.00, or collection of twenty-five distinct varieties for \$7.50. Also would be glad to send a special list of these to intending purchasers on application.

JAPANESE NOVELTIES AND SPECIALTIES

These will be found on page 64, and we recommend this class of plants as the Japanese plants are, as a rule, of easy culture and quite a valuable addition to the garden.

OUR NATIVE PLANTS

Under this class we have listed all the most showy and interesting beauties of our woods and mountains. These plants are eagerly sought by plant lovers in Europe and should be grown more extensively in this country, as they are better able to stand our climate, and there is variety enough that can be used for most any purpose.

New Indestructible Labels

If the name of a plant is lost, then the interest in the plant is lost, and it has been a vexing problem to get a label that would stand from year to year.

We are fortunate to have now a celluloid composition from which we make labels both stick labels to put in pots and hanging labels that can be attached with a copper wire. They are everlasting, can be written on with pencil and used over and over again.

We are pleased to supply these labels at \$1.50 per hundred, and would be pleased

to send a sample of each to intending purchasers.

STATE OF NEW JERSEY STATE BOARD OF AGRICULTURE

OFFICE OF THE STATE ENTOMOLOGIST

No. 163-1015

New Brunswick, N. J., October 18, 1915. New Brunswick, N. J., October 18, 1915. This is to Certify that I have the 15th day of October, 1915, in accordance with the provisions of Chapter 249, Laws of 1993, State of New Jersey, inspected or caused to be inspected by a duly appointed assistant the general nursery stock growing in the Universal Horticultural nurseries of W. A. Manda, Inc., Proprietor, at South Orange, in Essex County, New Jersey, and have found the same apparently free from San Jose Scale and other dangerously injurious insect pests.

insect pests.

This certificate expires June 1, 1916, and covers only stock actually in the nurseries when examined.

THOMAS J. HEADLEE,

State Entomologist.

OFFICE OF THE STATE PLANT PATHOLOGIST

No. 163-1915

New Brunswick, N. J., October 18, 1915. This is to Certify that the nursery stock grown by W. A. Manda, Inc., at South Orange, in Essex County, has been inspected in accordance with the provisions of chapter 54, Laws of 1911, of the State of New Jersey, and has been found apparently free from dangerously destructive plant diseases.

This certificate is invalid after June 1, 1916, and does not include nursery stock not grown in the State unless such stock is previously accepted by the State Plant Pathologist.

MEL. T. COOK,

State Plant Pathologist.

CATALOGS AND SPECIAL LISTS

Besides this book, we have the following either ready or in course of publication and will be pleased to mail to any one applying.

List of Collection Palms and Cycads List of Specimen Palms and Cycads List of Cypripediums

List of Rare Orchids

List of New Imported Orchids from Tropics

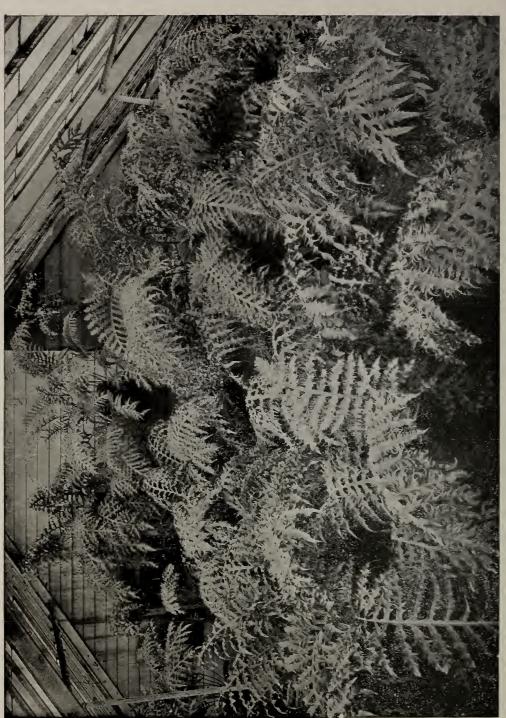

List of Roses List of Boxwoods List of Evergreens

List of any Specialty not fully listed in Catalogue

BETTER WAY THAN CATALOGS

Visit our nurseries at South Orange, where you will find the largest collection of plants of any establishment in America. Write, telephone or telegraph, and our Mr. Manda will meet you and conduct you about the nurseries and greenhouses. The nurseries are located right at the South Orange Depot or the D., L. & W. R. R. Eighty-four trains daily to and from Hoboken, or by trolley from Newark, N. J., only fourteen miles from New York City Hall.

Come, See and Be Convinced

The winner of more prizes than any Novelty ever introduced

Meritorious Novelties of Former Years at Greatly Reduced Prices

Polypedium Mandaianum (Manda)

Among the multitude of plants which I have introduced during my career, there is none that has impressed me as much as the Polypodium which we are offering now.

It is a plant that has grown in favor from year to year, and in its years of propagation developing new beauty and an additional quality as plant or cut green for decoration.

Great admiration of the plant is shown by every one who has had the fortune to see this wonderful plant growing or exhibited. It has carried everything before it, and stands to-day as the finest Novelty not only in America, but with the whole horticultural world.

The plant is very free-growing and makes beautiful specimens in all sizes, from 5-inch

pots up to large specimens in 20-inch tubs.

It is also a basket plant. A plant fastened on a piece of bark or cork will surpass in

beauty and elegance any stag-horn fern.

Planted on any old stump or tree fern trunk, it will soon make a head that will rival any tree fern in cultivation, and equally useful when planted on the wall of the greenhouse, where it will attach itself and make a dense covering of choice beautiful glaucous foliage.

Not only as a plant, but also in a cut state, it is most valuable for fine decoration. being, perhaps, the most lasting green in existence, for I had fronds keep fresh eight weeks in water, which is remarkable, and I therefore cannot too strongly recommend this plant for any purpose desired.

Different from anything in cultivation, and strongly reminds one of the classic Acanthus of the Greeks. These beautiful fronds in the hands of a floral artist will fill a

long-felt want.

		Price
Good plant, 4-inch pot or pan, each		\$0.75
Strong plant, 5-inch pot or pan, each		1.25
Strong plant, 6-inch pot or pan, each		
Extra strong plant. 8-inch pot or pan, each		
Extra large specimen, each	.\$5.00 to	10.00

Also plants on blocks or baskets or on tree fern stems, prices and sizes on application.

(FROM "GARDENING ILLUSTRATED," LONDON, JULY 27, 1912)

A Fine Greenhouse Fern (Polypodium Mandaianum)

"This fern, which was given a first-class certificate at Holland Park Show, comes to us from America. Specimens of it were shown by Mr. W. A. Manda. South Orange, N. J., at the International at Chelsea, but I believe it was not placed before the committee on that occasion. It, however, at that time attracted a good deal of attention as a very beautiful fern, which, from its bold habit, high ornamental qualities, and the lasting nature of its stout, leathery fronds, was likely to prove of considerable value for decoration."

AS EXHIBITED BY W. A. MANDA AT NATIONAL FLOWER SHOW, CHICAGO

The sensational plant of the First National Flower Show, where it captured the first prize, a Silver medal, as the Best New Fern not in commerce, and also the Grand Gold Medal for the best plant not yet an article of commerce. Mr. John Thorpe, the veteran plantsman, states in the Christmas number of "Florists' Exchange" as follows: I will say that the most valuable plant, the most progressive plant, the plant which has gained the gold medal, is Polypodium Mandaianum, and I have no hesitation in saying there will be as many forms of it as in the case of Nephrolepis exaltata. Fortunately all the Polypodium family are good keepers under adverse circumstances. They will live where palms will not. For temporary decorations with cut flowers the polypodium will last as long as any of the asparagus. None of the polypodium are an exception to this rule. From a decorative standpoint, the configuration of the plant, its adaptability, it is equal to any plant ever introduced."

FROM "THE JOURNAL OF HORTICULTURE AND HOME FARMER," LONDON, ENGLAND, MAY 30, 1912.

"The exhibit of foliage plants by W. A. Manda, the American exhibitor from South Orange, U. S. A., deserves mention, particularly for his fern Polypodium Mandaianum, with fronds 5 feet long and 20 inches broad, the pinnae finely cut. This was shown upon wood rafts, and also towering above the stem of a tree fern. The fronds, when cut, remain fresh for several weeks."

Anthericum Mandaianum (Manda)

This grand plant is one of the most beautiful in cultivation, forming a dense, compact plant with leaves from 4 to 6 inches in length of a beautiful dark green color, with a bright yellow middle like a miniature Pandanus Veitchii.

The plant throws out long flowering stems at the axis, at the end of which new plants is the plant of the plant in the plant is the plant in the plant.

form which root rapidly in the air, making it well-adapted for a hanging basket plant or edging where vines are desired. Plants in 2 and 3-inch pots can be used for the center of fern dishes or similar work. It is very durable, does only require a cool greenhouse to grow same, and it is a very useful plant for the house and can be used in windowboxes on the piazza or out of doors.

Fine plants, 2-inch pots, each	0.15	Fine plants, 5-inch pots, each	\$0.75
Fine plants, 3-inch pots, each	.35	Fine plants, 6-inch pots, each	1.00
Fine plants, 4-inch pots, each	50	Specimen plants\$2.00 to	3.00

Every one should grow this plant.

Anthurium Andreanum Hybrids (Manda)—After twenty years of hybridizing I have now over twenty fine named varieties, varying from richest red to the purest white. One of the easiest growing and free flowering plants in cultivation. The flowers are most durable, lasting three months on the plant and one month when cut. Price of flowering size plants, our selection, \$1.00 each; 6 plants in 6 named varieties for \$9.00; 12 plants in 12 rare varieties for \$25.00.

Anthericum Commosum—The type from which A. Mandaianum was raised. Compact plant with bright green leathery foliage and long streamers with young plants, making an ideal plant in green color what A. Mandaianum does in variegated. Price, 25c. each; \$2.50 per dozen.

Asparagus Retroflexus—Fine addition to this useful class of green decorative plants, upright growth of very light green foliage, making a fine plant or useful cut greens for artistic decoration. Strong plants at 50c. each; \$5.00 per dozen; specimens \$1.00 to \$2.00.

Geranium, Everblooming Scarlet (Manda)—One of the grandest varieties as a bedder or for winter flowering under glass. Plant free growing, producing innumerable large trusses of flowers. The individual flowers are bright scarlet red, as large as a silver dollar and last well. Price, 2½-inch pots, 15c. each; \$1.50 per dozen; \$12.00 per 100. Strong specimens in 4-inch pots at 50c. each; \$5.00 per dozen.

Selaginella Mandaiana (Manda)—One of the surprises that came with an Orchid importation. Extraordinary quick grower, forming a fine compact plant of drooping habit. Excellent plant for any purpose, especially for baskets or edges of greenhouse benches or flower boxes. Not only the beauty of the plants is to be recommended, but the extreme hardiness of the plant, as it is the most durable and easiest growing Selaginella in cultivation. Strong plants. 50c. each: \$5.00 per dozen.

Ten New Tradescantias of great interest and usefulness. Collection of 10 varieties, one of each, \$2.50.

Tradescantia Laekenensis-White, green and pink foliage. 25c. each.

Tradescantia Fluminensis—Green, small foliage, white flower. 25c. each.

Tradescantia Thuringia—Green and white foliage, 25c. each.

Tradescantia South Orange Golden (Manda)—Bright golden yellow foliage. 25c. each.

Tradescantia Aureo-Striata—Foliage green with yellow stripe. 25c. each.

Tradescantia versicolor-Beautiful green, white, red and pink. 25c. each.

Tradescantia Hypophaea—Upright, red stems and foliage, 25c. each.

Tradescantia Lanceolata—Foliage large, green and downy. 25c. each.

Tradescantia Bengalensis—Foliage small, red, fleshy, flowers blue. 35c. each.

Tradescantia Dracaenoides—Dracaena-like, forming strong streamers. 50c. each.

Salvia Golden Dwarf (Manda)—Beautiful dwarf-growing plant, making fine compact globular mounds of bright golden foliage superior to Golden Bedder Coleus. Price: 15c. each; \$1.50 per dozen; \$12.00 per 100.

Begonia, Christmas Red (Manda)—A seeding from Semperflorens and Mrs. Wm. S. Kimball, of close, compact habit with bright glossy foliage; profusion of bright-red flowers, being at its best from Christmas until Easter, but flowering all year 'round. Price, 25c. each; \$2.50 per dozen.

Begonia, Mrs. Wm. S. Kimball (Manda)—A grand greenhouse flowering variety of upright growth and produces beautiful shell-pink flowers from Christmas until after Easter. Nice plants. Price, 35c. each; \$3.50 per dozen.

Fourcroya Watsonii—A remarkable plant with long thick leaves, beautifully colored with broad stripes of yellow and red on bright green ground; a rare plant. Price on application.

Dracaena Kelleriana (Keller)—Improvement on D. Godseffiana, being of a more compact growth and better colored foliage. Price, \$1.00 each.

Dracaena Rothiana—Not a new but rare plant of which great merit of extreme hardiness has only now been discovered. As the plate shows, it is of a compact growth with thick leathery foliage, green with narrow white margin. One of the best decorative plants for home, greenhouse or out-of-doors in the summer. Price, strong plants, \$1.00 each; \$10.00 per dozen. Extra large, \$2.50 each.

New Antirrhinum Nelrose—A beautiful, silvery pink variety of this popular flower. Is continuously in bloom. Requires no disbudding and is the best pink variety for bedding outdoors. Blooms continuously all winter in the greenhouse. Price, 15c. per plant; \$1.50 per dozen.

Meritorious Novelties of Former Years

Nephrolepis Tuberosa Plumosa (Manda)

Nephrolepis Tuberosa Plumosa (Manda)

This beautiful fern is quite distinct from all of the other varieties of the Boston

Fern in so much that it has been raised from the Japan species N. Tuberosa, which type is much hardier than the Exaltata.

The fronds are long and narrow; the pinnules beautiful plumose which are of light color, giving the fronds a beautiful effect on account of the two distinct shades as well as its graceful waviness, and will be found a great and distinct addition to collection ferns. Fine plants, in 3-inch pots, 25c. each; \$3.00 per dozen. Specimens, \$1.00 to \$3.00 each.

Nephrolepis "M. P. Mills" (Harris)

This is one of the gems of this large family of ferns. In aspect like a miniature Whittmanii, but of wiry growth that does not break and one of the most durable of the plumose type. Award of Merit from the Horticultural Society of London. 2½-inch pots, 25c. each;

\$2,50 per dozen. 4 and 5-inch pots, \$1.00 each.

Cyrtomium Rochfordii

A crested Holly Fern having large broad pinnae which is much finer divided and more ornamental. This plant needs only a cool temperature. Fine plants, 25c. each; \$2.50 per dozen.

Polystichum Varium

Introduced by me from South Africa. One of the hardiest and most useful ferns in cultivation, growing to medium size with rather broad pinnate fronds which are of a beautiful red color when the fronds are young. Strong plants, 25c. each; \$2.50 per dozen. Larger specimens, \$1.00 to \$3.00 each. Euonymus Rosmarinifolius—Perfectly hardy evergreen foliage, shrub growing 2 feet in height. The foliage is narrow, green in summer, turning bright scarlet and keeping so all winter. Grand plant for edging of shrubs, borders and beds of Rhododendrons, or like plants. Price: Good plants, 25c. each; \$2.50 per dozen. Limited number of strong 3-year-old plants. Price, 50c. each; per dozen, \$5.00.

Salvia Greggii—Native plant of great beauty. Hardy in most parts of the United States. Grows 2 to 3 feet in height. The plant is literally covered with crimson flowers of good size. Great acquisition to our hardy plants. Price, each, 15c.; per dozen, \$1.50.

Yucca Flaccida Auro-Striata (Manda)—Perfectly hardy plant, as showy as a Pandanas, forming a plant 2 feet high, with long leathery foliage, beautifully striped with golden stripes. Flowers large lily-like on stems 4 to 6 feet high. Grand evergreen hardy plant. Each, \$1.00; per dozen, \$10.00.

Ophiopogon Japonica (Japanese Lily of the Valley)—A perfectly hardy evergreen plant, with fine leathery foliage growing about six inches in height, and thriving well under trees where grass will not grow, and, therefore, a grand acquisition for that purpose, and a rival of the Pachysandra terminalis. 15c. each; \$1.50 per dozen; \$12.00 per 100.

HARDY CACTI

The following ten varieties of Cacti have proven quite hardy and will make a grand addition to rockwork or small borders:

Price	each
Cactus Missouriensis—New small-growing plant	\$0.50
Echinocactus Simpsoni—Large head, short spines, pink flowers	1.00
Echinocactus Simpsoni—Perpetual Snow (new) with woolly crowns	1.00
Echinocactus Viridiflorus—Neat growing plant for rockwork	.75
Opuntia Arenaria—Small-growing species	.50
Opuntia Camanchica—Very spiny and showy	.50
Opuntia Mesacantha—Good compact-growing species	.50
Opuntia Phaeacantha Major—Large grower	.50
Opuntia Polyacantha—Quantity of white spines	.50
Opuntia Polyacantha Albispina-White-spined, fine variety	.50

New Rose Wichuraiana Hybrid "Peach Blow" (Manda)—This is one of the grandest pink varieties ever raised. It is exceedingly floriferous, flowers borne in great upright clusters, double, of a beautiful peach blow color, and keep for a long time. Price: $2\frac{1}{2}$ -inch pot, 75c. each; \$7.50 per dozen. Two-year-old plants, \$2.00 each; \$20.00 per dozen.

Rose Wichuraiana Argentea (Manda)—The foliage is of a beautiful silver and pink variegation, especially in the new growth, giving the plant a decidedly novel and unique appearance. The habit of growth and the flowers are like the Memorial Rose, which is its parent. Price: 2½-inch pot, 50c each; \$5.00 per dozen. Two-year old plants, \$1.50 each; \$15.00 per dozen.

Rose Dazzling Red (Manda)—New Wichuraiana Rose. Finally I have succeeded in raising a strictly Wichuraiana Rose with flowers superior both in color, size and durability to the well-known Crimson Rambler; the foliage is bright and glossy, almost evergreen; very strong and rapid grower, while the flowers are produced in great profusion and are of a large size and of a beautiful ruby red color that does not fade. Price: 50c. each; \$5.00 per dozen. Two-year-old plants, \$2.50 each; \$25.00 per dozen.

Rose Bridal Wreath (Manda)—An addition to the beautiful climbing rose, a cross between the Wichuraiana X Multiflora section with good foliage, strong growth and exceedingly floriferous, producing innumerable semi-double white flowers which almost cover the foliage. Excellent variety for any use which I can recommend. Price: 50c. each; \$5.00 per dozen. Extra large two-year-old plants, \$2.00 each; \$20.00 per dozen.

Rose Francis Scott Key (Cooke)—Very vigorous, free grower, naturally producing stems that are two to three feet long. Every shoot produces a flower. The flowers are as large as the "American Beauty" and well formed. The color is a clear red. It flowers just as freely as "Radiance"; a decided acquisition. 75c. each; \$7.50 per dozen.

Rose "Ophelia"—Color clear, bright salmon, often deepening toward golden pink; wonderfully fragrant, with long pointed buds and stiff stems. Large, handsome foliage, showing that it is a wonderfully free bloomer and grower. 75c. each; \$7.50 per dozen.

Rose Prince E. C. De Arenberg—This rose has a lively, clear color, scarlet, with deeper shadings, not inclined to turn blue, and is especially lively under artificial light, holding its color as long as the flower lasts. 75c. each; \$7.50 per dozen.

Rose Killarney Brilliant—Has the same habit of growth and freedom of bloom as its parent; color very brilliant pink, which in dull weather shades to almost crimson. 75c. each; \$7.50 per dozen.

Rose Hadley—Deep, velvety crimson, retaining its brilliancy all seasons of the year; strong, rigid growth and flowers borne on long, stiff stems; has proved itself on trial to be a first-class variety. 75c. each; \$7.50 per dozen.

Rose Madame Edouard Herriot (Syn. Daily Mail Rose)—Color of this rose is a gorgeous combination of reddish terra-cotta and bronze, with flame shadings; almost impossible to describe. Artists have raved over this variety. \$1.00 each; \$10.00 per dozen.

New Asparagus "Cut and Come Again"

Asparagus elongatus (Manda). Few years ago I had distributed few plants, but now have propagated sufficient quantity for general distribution. An upright grower sends out stems up to 8 ft. in height, terminating in a broad head of fine, light green fluffy foliage, as seen by the photo-engraving. This is most useful for cut green foliage, especially as it can be cut with straight stems 5 to 6 ft. long. The great advantage is that after the heads have been cut the stems will break out and produce a new crop ready to cut in a few weeks, thus can be recommended as the most prolific plant for cut green. It thrives best when planted in beds like other Asparagus. Strong plants, 25c. each; \$2.50 per dozen; \$18.00 per 100.

Manda's Golden Privet

Manda's Golden Privet

Almost an evergreen. This shrub is of such sterling merit that we must mention it here. The growth is free, bushy and compact. The closely set green leaves are heavily margined with golden yellow, covering the greater part of them. The color holds remarkably well during the season. It does not bleach or burn in the hot sun, and is the only yellow foliage shrub which holds its perfect coloring in the fall. We do not hesitate to say that this is the finest colored foliage shrub in cultivation. It is perfectly hardy and can be used for any purpose desired, such as an isolated specimen or planted in close proximity to Red Japan Maples; this plant offsets and gives additional color and value to both. It produces a unique effect when planted as a hedge and can be kept to any size, either high or low. Silver medal awarded by the Massachusetts Horticultural Society, and numerous certificates wherever exhibited.

Young plants, 2 in pot 15c. each; \$1.50 per dozen; \$10.00 per 100; 1-year-old plants, 25c. each; \$2.50 per dozen; \$20.00 per 100; 2-year-old-plants, 35c. each; \$3.50 per dozen; \$30.00 per 100; 3-year-old plants, \$1.00 each; \$10.00 per dozen; 4-year-old plants, specimens, \$1.50 each; \$15.00 per dozen.

New Dahlias for 1915

The following set of six varieties forms a collection of the finest Dahlias ever raised. The result of special crosses bringing in new types and blood into these flowers. Their free growing habit, extra fine and healthy foliage and extra freeness in producing innumerable flowers, long stout stems, holding the flowers well upright so that they can be cut with stems of two feet or more. Their wonderful lasting quality and the extraordinary size of the flower, solid texture as well as the beautiful colors, making these the finest set of fancy and decorative Dahlias that have ever been sent out.

This was well proven, not only by the great admiration of every one who has seen these Dahlias, either at South Orange or when exhibited at the various exhibitions throughout the country, but they have received the highest prizes whenever exhibited against competition with all the best Dahlias in cultivation, which proves them superior to any other Dahlias grown at present.

At the New Jersey Horticultural Society Dahlia Exhibition we received for these Dahlias in competition, eleven first prizes and eleven first-class certificates.

From the Morris County Florists' & Gardeners' Society, a certificate.

From Oyster Bay, a medal.

From the Horticultural Society of New York, two certificates and special mention.

From Newport Horticultural Society, three certificates and medal.

From the New York Florist Club, four certificates.

The committee also visited our nursery and were greatly impressed with all the qualities which we claim for these plants.

We are ready for distributing the bulbs from February on, and strong, young plants in three-inch pots in May and June.

DAHLIA, MRS. MINNIE BURGESS—Strong upright grower, with fine dark foliage producing extraodinary amount (110 flowers open at one time, being counted on one plant) very large bright scarlet flowers in the shape of the D. Juaresi, one of its parents. The best and most floriferous scarlet variety in cultivation that should be in every collection either as a plant or exhibition flower.

We beg to advise to order in sets at these greatly reduced prices as early as possible.

DAHLIA, SOUTH ORANGE SURPRISE (Manda)—This variety forms quickly an extraordinary large bush with fair stems and quantity of well-formed flowers of good size, varying in color from the purest white, through all the shades of yellow, orange, bronze, or having two or three of these colors combined in the one flower. Indispensable in any collection. It is very interesting to watch its development, and to see quite often three flowers on one stem, each entirely distinct and different in color.

DAHLIA JOSEF MANDA (Manda)—Strong, free grower with ample foliage, and heavy stems supporting large perfectly double flowers closely formed of broad petals of the brightest red color. Grand for exhibition as well as useful variety for the garden.

DAHLIA VERONICA MANDA (Manda)—Extremely dwarf grower, and one of the most profuse flowering Dahlias in cultivation, growing only to two or three feet in height, producing a carpet of flowers of medium size formed like a Water-lily, and a beautiful lemon color, shaded with rose at the tips. As a cut flower it lasts for two weeks. A grand plant for any purpose.

Dahlia, Mrs. Alfred I. Du Pont (Manda) (One-half Natural Size)—One of the most extraordinary varieties in cultivation. Extra good in habit, beginning to flower very early in the season and continuing until frost. The foliage is luxuriant and the stems are strong and upright, two feet in length, supporting an extraordinary large flower, perfectly double, chrysanthemum like. The color is of the brighest ruby red, showing scarlet under artificial light. This variety has received several certificates and also the first prize as the best decorative Dahlia at the New York Horticultural Society Dahlia. Exposition, Bronx Botanical Gardens, as well as other exhibitions.

This beautiful Dahlia is named, by permission, in honor of one of the most liberal

patrons of Horticulture.

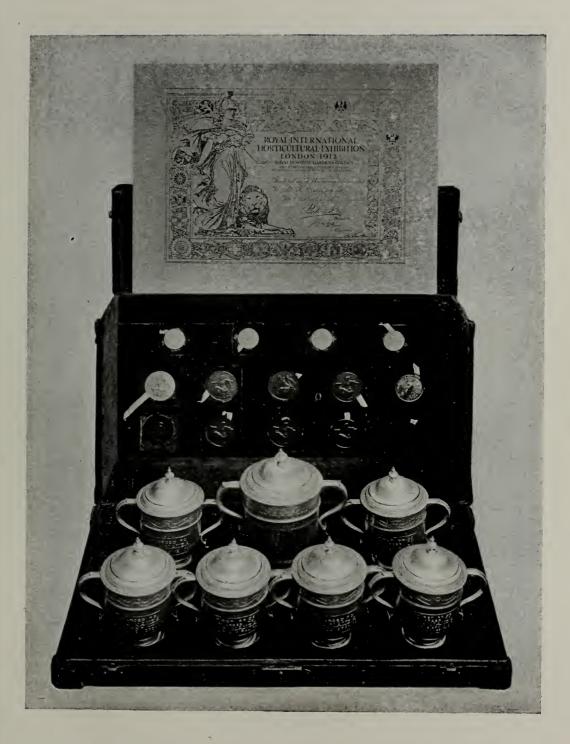

Gertrude Manda (Manda) (Natural Size)

Dahlia Gertrude Manda (Manda)—Very free grower, sending out long graceful stems with medium size most beautifully formed flowers, of the grandest peach-blow shade of color imaginable, and one of the finest for cut-flower purposes or for garden decoration. Lasting long time on a plant or when cut.

Be sure and order a set or two of these MOST BEAUTIFUL NEW DAHLIAS Also other Novelties from this Catalogue

Set of the 6 varieties, 1 strong bulb of each for\$	
Set of the 6 varieties, 1 strong green plant of each for	2.50

Set of 1915 and set of 1916, Novelties, 12 varieties, 1 green plant of each for	7.50

Seven Cups, Fifteen Medals and One Diploma of Honor Won at the Great Royal International Exhibition, London, England, May, 1912

Example of our Landscape Work, Preserving Nature

The Ornamentation of Grounds, Plans and Planting

Landscape gardening, a recognized profession through whose advice and supervision enable you to produce a perfect and harmonious effect of grounds surrounding your dwelling, make a picture that changes not only every day of the year, but also during different parts of the day, makes an inviting place for you to take healthful walks, and inhale the ozone of pure fresh air, balmed with sweet perfume of various flowers, a playground for your family, grounds which furnish you with beautiful flowers, fresh and wholesome vegetables and delicious fruits for your use or a welcome gift for most any occasion.

All my life has been spent in studying and practicing the profession of a horticulturist, having made myself familiar with most of the trees, shrubs and other hardy plants, their habits, eventual development, their time of flowering, the effect produced by them during certain seasons of the year, the soil necessary, the exposure needed and hardiness of the flowers and plants and the proper treatment for developing same has been my first aim to acquire.

Now, with this knowledge gained by practical experience of forty years, I have devoted my attention to the study of nature and the effect produced unaided by the hand of man, and must confess there are such rural sections in America and Europe that no skill of landscape artist could improve upon. In fact, it might be said the mission of the landscape gardener is to imitate nature in the style of gardening and harmonize and combine effectiveness in the formal style of gardening and render limited spaces as attractive as possible with a very moderate outlay of money. This outlay should not be classed as an expense, but as an investment, for, while buildings, either of wood, stone or any other material, deteriorate from year to year, on the contrary, a small sum of money judiciously invested in planting the ground with choice trees, shrubs and plants will be the most remunerative investment, for, with little care, the choicest trees, shrubs and plants will increase in size and beauty from year to year, and in a short time have a hundred-fold value of the original outlay. In other words, it could be said that grounds around the buildings, judiciously planted with the proper material, will increase the value of the property in about the same ratio as buildings will deteriorate and will be worth less than originally expended upon them, thus, in that light, it must be properly regarded as an investment and not as an expense.

Landscape Gardening

Landscape Gardening, or Landscape Architecture, as it is generally called, is not anything new, but only newly practised as far as America is concerned. It is an art employed in the conception and designing and ornamenting grounds generally adjacent to country dwellings, the building of artificial gardens, preserving the natural growth of trees, shrubs and plants, and assisting nature in developing a pleasing effect, a setting for residences, a pleasing retreat during the summer months, a creation of natural panoramic picture ever changing from day to day, and from season to season, always something of interest to admire.

Points to Observe

There are two cardinal points in the successful landscape garden. The first is to know how, and the second, to have the material to do it with, both of these being essential to the ultimate result.

Residence and Planting of Rhododendrons and Evergreens

Landscape Gardener

It is well-conceded that to build a house, it is not alone the builder that is necessary, but an architect first, to conceive, design and formulate a specification for building such a house as the owner requires.

So it is just as important for anyone building a garden to employ a landscape gardener or architect to prepare and form the proper plans and specifications for the improvement of the grounds, for otherwise if this is done by guesswork only, naturally it would have to be changed over and over again at double or triple cost with no result whatever obtained.

First to Consider

In the first place, the wishes of the owner are to be consulted, also the purpose for which the grounds are to serve. For instance, if it is to be a summer residence alone, then only such trees, shrubs and plants should be selected that make the best showing at the time of the year when the house is occupied and the garden mostly used.

If it is an all-the-year-round residence, then all the features that the property is capable of developing should be considered, so that either summer or winter, spring or fall, there is an abundance of material that will enhance the beauty of the ground and keep the owner interested in the home grounds.

Combine Useful with Ornamental

But not only the ornamental section, but the useful part should not be neglected, and ample provision be made for vegetable and fruit gardens, so that the grounds would yield all the advantages that could be produced.

Locating of Buildings

The operation in developing the grounds that should follow each other in this rotation—first of all, if the grounds are entirely new and unimproved, and no buildings existing on the same, is the locating of residence, stable or garage and other outbuildings, conservatories and greenhouses, the main pleasure garden, flower garden, vegetable and fruit garden, the latter two being combined together for practical purposes.

Road Building

After the location of buildings, next in order is to locate and begin building the proper roads. While the roads are being built, the general or rough grading should begin, so the grading of the ground conforms to the roads which should be able to be in shape as soon as they are built, to cart back and forth whatever material needs shifting.

Planting of Trees, Etc.

After finishing the grading, which should be done thoroughly, the next operation is the planting of trees and shrubs, there should be plenty of good soil which is necessary for the good growth of everything that is planted on the ground, including the lawns.

Proper Selection and Distribution

The proper selection and judicious distribution of the various trees, shrubs and plants should not be lost sight of, and the very best material used. For, remember that a poor variety of a tree or shrub takes just as much and more care than a good one and will retard, and, perhaps, never attain the perfection and result that was desired, for remember, there is nothing cheap in nature, and whatever is worth doing, is worth doing well.

Fertilizers a Necessity

The grounds, especially where stock is planted, should be well-fertilized so as to give the newly set trees, shrubs and plants every chance and every encouragement to develop their beauty.

Proper Care of New Plantings

After the planting of the trees, shrubs and plants, the most important thing is to take care of them. For remember, that plants, trees and shrubs are only living beings domesticated and raised with great care in nurseries. They require reasonable attention and care just the same as a domestic animal that has to be fed and watered, kept clean and looked after, and not to be let loose in strange surroundings to care for themselves.

Special Features

These, according to the size and adaptability of the grounds, and the wishes and tastes of the owner, the following special features could be brought out more prominent and made a separate section of the grounds, such as Rose Gardens, Hardy Old-Fashioned Gardens or Herbaceous Borders, Rock Gardens, Water and Bog Gardens, Bulb Borders or Bulb Gardens, Formal Gardens (generally misnamed Italian Gardens), Wild Gardens and other special features which I will treat briefly.

Adaptability of Grounds

It is advisable to study the adaptability of the grounds, their surroundings, and find out which of the special features are best adapted and could be most practically produced that would harmonize with the developed or undeveloped grounds, so that it would not look out of place, but add beauty to the grounds instead of detracting from same, and thus saving labor and expense.

Rose Gardens

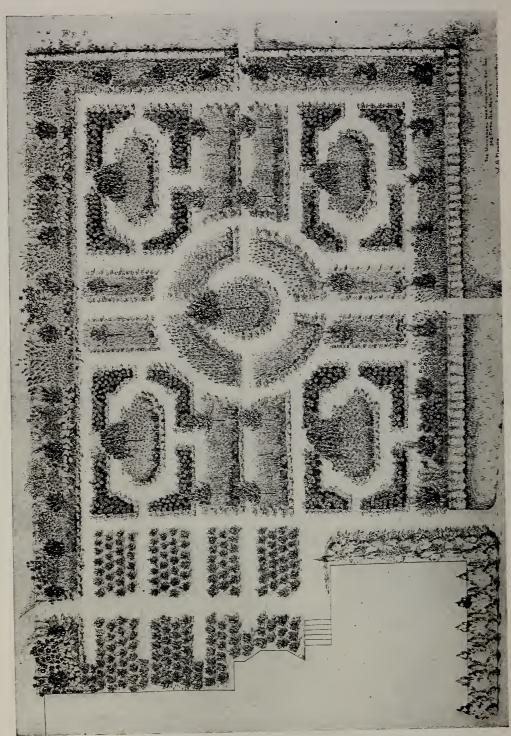

This is, perhaps, the most popular section of gardening. When it is attempted on a large or small scale, it is advisable to have roses planted together so to be able to give them the proper cultivation and proper care, guarding them against insects, and when in bloom would produce an effect which is lost when they are scattered promiscuously. Of course this applies to the so-called Hybrid Perpetuals, Hybrid Tea Roses, while Hybrid Wichuraiana Roses and the Hybrid Multiflora and other climbing varieties can be used for special features in any part of the grounds, either as climbing or trailing plants covering the banks, rocks, stumps and trees, or forming a good defensive hedge if planted on a wire fence.

The Japanese, Rosa Rugosa, is best adapted for massing with shrubs, excellent as a hedge plant or individual specimen.

Old-Fashioned Gardens and Borders

Perhaps the most fascinating, useful and pleasure-giving class of gardening that can be attempted on either a large or small scale with trifling expense. Such gardens can be arranged either in natural or formal style, while the material that can be used comprises a large number of plants, including all the old-time favorite plants that take care of themselves and increase in size and beauty from year to year, and with the proper selection will form a most interesting feature from early spring, when the snow leaves the ground, until the ground freezes up again in the fall.

To these plants can also be added selections from the best bulbs and, including a section for roses, can be dotted with shrubbery grown as a standard, which will add variety and relief to the apparent monotony.

The same class of plants can also be used for borders. It is preferable to have such borders in front of and backed by small trees or shrubbery to give it a good background, or some of the taller-growing plants can be used for planting between the shrubs, thus giving the shrubbery time to develop and grow together. Dwarf kinds can be used as an edging and border in front of the shrubbery.

Formal or Erroneously Called Italian Gardens

This class of gardening is advisable, especially in the immediate vicinity of the residence, and to form, so to say, a setting for the house, or where the location is suitable, then a Formal Garden might be considered as an improvement, but where it is placed without there being any need for such a garden, it is apt to look more like a plaster, and disfigures the landscape.

It must be stated here that Formal Gardening is the most expensive and most difficult to keep in condition and proper beauty, as any failure of any part will mar the entire design and show it plainly, but, as above stated, as a setting to a house or in the proper section of the garden, screened by a hedge or a planting so as to form a surprise, a Formal Garden is advisable.

Bulb Gardens or Bulb Borders

With the proper selection of bulbs, a succession of bloom could be had from the early spring to the late fall, beginning with the Snowdrops and Crocus, and following up with the Hyacinths, Tulips and Lilies through the summer until the late fall.

Bulbous plants, to a large extent, could also be used in planting the Old-Fashioned Formal Garden is advisable.

Water and Bog Gardens

Where the ground contains either running or still water, these gardens are highly recommended, but, would not advise where same are to be artificially built and water brought by artificial means, which, as a rule, is never successful and rather expensive.

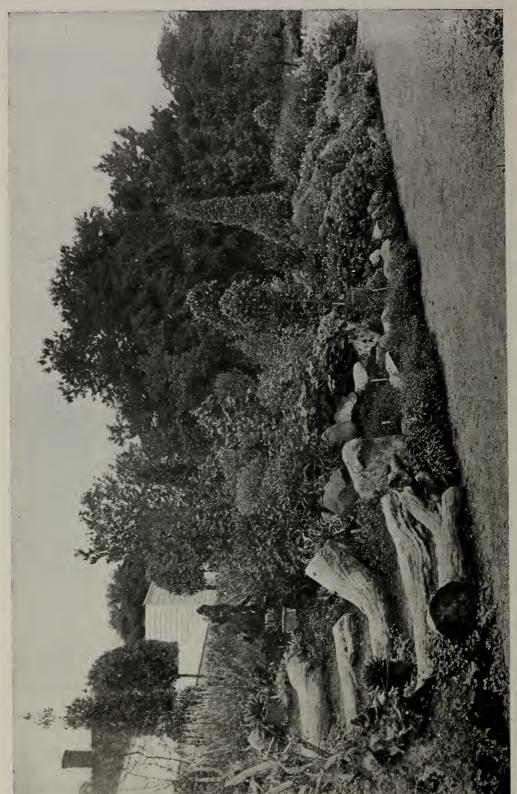

But where the ground is naturally wet and the water is abundant, one could produce the most pleasing feature by planting the submerged ground, having water from six to twenty inches in depth, with large varieties of Water Lilies, Egyptian Lotus and other water plants, while the edges could be planted with a wealth and array of the Iris, Lilies, Cardinal Flowers, Hardy Orchids, Insectivorous Plants and the ever-blooming Forget-Me-Not, and hosts of other plants that delight in water or wet situation and thus turn an unsightly spot into a beautiful feature.

Rock Gardens

These should not be attempted unless the grounds are naturally rocky and the material for making same easily procured. To be effective, such gardens should not be exposed, but have a banking of evergreens or flowering shrubbery, into which these should blend or disappear.

The plants generally used in Rocky Gardens are not a showy class of plants, but very interesting, and in that way you can cultivate a great many little gems that otherwise would be lost in planting in a regular garden or herbaceous border.

Care should also be taken not to plant any large or rank-grown plants which would tend to smother and suffocate the smaller and more delicate rock and alpine plants proper, which are the only class of plants that could be used for this special type of gardening.

Rock Garden Leading to Greenhouse and Merging into Natural Gardens

Wild or Natural Gardens

These are easiest made and easiest kept of all the gardens, especially where the grounds are naturally endowed by nature for that purpose.

All there is needed is to plant promiscuously hardy and other plants which are more or less related or akin to those naturally found there. In other words, it is simply adding to the natural existing beauty without any restraint and not building any artifice in any way.

Hedges

Hedges are clearly preferable to walls, wire or any other fences for the delineation of property as well as protection against trespassing. This can be accomplished either by a single line of one variety of plants, or by adding in or making an irregular planting of wavy border which takes away the stiffness of the single row.

Great many varieties of plants can be used advantageously for this purpose, acording to the wishes of the owner; that is, whether a light hedge or a high hedge is desired, and whether the hedge at the same time is wanted to furnish a screen or a windbreak or to hide any unsightly or objectionable view on the adjacent grounds. It is not only more beautiful than the ordinary wall or fence, but it is also cheaper to plant and keep in condition than the building of fences and keeping them in repair.

Conservatories or Greenhouses

Another source of enjoyment and beauty is the erection of glass structures which might also serve as a sun parlor in the winter time. In these glass structures not only plants and flowers can be raised, but also early vegetables and plants started early to be ready for planting when the spring and summer season opens.

Plans for such buildings and specifications for same should always be provided by a practical landscape architect, so that it would be made more useful and profitable and well-suited for the class of plants or stock that is expected to be grown there.

Vegetable and Fruit Gardens

This is a useful adjunct to the ornamental garden, and one that should not be neglected or lost sight of, as through this means the owner is not only well-provided with beautiful flowers and plants, but with a useful and healthful supply of fresh vegetables in season as well as luscious fruit from the beginning with strawberries and ending with the almost ever-keeping apple.

Material for Garden Ornamentation

Special attention is paid to the cultivation so as to produce strong, thrifty and healthy stock with a fine mass of roots, which, in most cases, lift with a ball of earth, so that the plants hardly know that they have been shifted from the nursery where they were grown to the place where they are destined to decorate and grow into beautiful specimens.

Importance of Transplanted Stock

Now, coming to the other point which treats with the material necessary to produce the effect in this connection, I have a most advantageous position, being connected and interested with one of the largest plant-growing establishments, The Universal Horticultural Establishment of South Orange, N. J., Plainfield, N. J., and St. Albans, Herts, England, where we cultivate the largest collection of decorative stock of any firm existing, and especially such stock as is needed in the Landscape Department.

Woods Ornamented with Rhododendrons, Boxwood, Kalmia and Azalea

Large Specimen Stock for Immediate Effect

Not only are we well-equipped with a general stock of small sizes and ordinary kinds of trees and shrubs that are generally used, but our collection contains some of the finest, rarest and largest specimens that is possible to be transplanted, which gives and produces immediate effect, and saves years and years of waiting, and takes away the impression of a newly laid-out place immediately.

It is always preferable and advisable to use good-sized specimens as well as the choicest varieties that can be obtained, and avoid as much as possible the planting of inferior stock, as when it grows up it will be a detriment and an eyesore rather than a beautiful object in the garden.

Selection of Choicest Varieties

The ornamental trees should be regarded in the same light as fruit trees, for if you are going to plant a fruit tree, you want to plant the choicest and most popular variety rather than a wild seedling that will produce only sour fruit, and in the end you will be at the expense of rooting same out of the ground, having lost years and years of waiting, and have to try over again with the proper kind of stock.

Conifers or Evergreen Trees

Another class of stock which I take pleasure in especially recommending is the Conifers or Evergreens. This class of plants are evergreen through the entire year, and whose gift of green and cheering effect in the winter, when other trees are in their dormant condition and have lost their foliage. Not only are they beautiful, but healthy also. Their resinous odor purifies the air and makes a healthful atmosphere.

The evergreens are especially noticeable in the spring when they are making their new growth, which blends the colors from the darkest green to almost a bright yellow and deepest metallic blue. They vary in form and size also, some attaining the height of three hundred feet, while others are small and compact growers, so they can be used for almost any purpose.

Broad-Leaf Evergreen Shrubs

Another class of plants I wish to recommend is the one called the Broad-Leaf Evergreen Plants. This class contains such beautiful shrubs and plants as Boxwoods, Rhododendrons, Azaleas, Andromedas and other floral gems that have, as a rule, leathery bright green foliage throughout the year, while in the spring and summer they produce a wealth of flowers such as the Azaleas, Kalmia and others. The majority of plants of this class are especially adapted for planting in the shade of other trees where they thrive admirably and produce a distinct effect.

Hardy Perennial or Herbaceous Plants

Another class that more attention should be paid to is the Hardy Perennial or Herbaceous Plants. This class contains a great number of old-time varieties found only in old-fashioned gardens. Plants that contain the early harbinger of the spring, such as the Primrose, Clove Pinks, Moss Pinks, Columbine, Poppies, Daronicum and Meadow Sweet, which are followed later in the season with such favorites as the Larkspur, Coreopsis, Harebells, Poppies, Peonies and numerous varieties of Iris, Fleur-de-Lis, Forget-Me-Nots, Pink Daisies, Phlox and so on, through the summer, until it finishes up with a wealth of different varieties of Daisies, Hardy Sun Flowers, Giant Daisies, Cone Flowers, varieties of grasses and Michelmas Daisies, and finishing with an array of Hardy Pompon Chrysanthemums which comprise every color excepting blue, and which

Water Garden One Year After Last Crop of Corn Has Been Gathered

harmonize well with the colors of the turning autumn foliage, and are in their beauty when the ground has already frozen.

The plants are inexpensive, increasing in size and beauty each year, and should be extensively used.

Our Patrons

These classes of plants our firm has been supplying to the most critical buyers in the country, either in small or large quantities, from the cottager to the largest parks in the country, furnishing stock to the White House in Washington, to the Department of Agriculture, Department of War and other similar institutions, while there is hardly a large estate in the country that we do not furnish with some of our choice stock, either for the beautifying of the grounds, the greenhouses and conservatories.

Superiority of Our Stock

Not alone this speaks well for The Universal Horticultural Establishment, but also forms the best criterion as to the overwhelming sucesses that the firm always achieves at any of the horticultural exhibitions, leaving out the minor or local exhibitions and taking three of the greatest horticultural events in the last forty years, namely, The First National Flower Show in Chicago, Illinois; the second National Flower Show in Boston, Massachusetts: and the Second Royal International Exhibition of London, England.

From the records of these three great exhibitions, it will be seen that we have carried in open competition the highest honors and the largest amount of prizes on every occasion.

Horticultural Adviser

When in doubt about any question pertaining to Horticultural, I would be pleased to give such advice as would save disappointment and give results, either by correspondence or by a personal call or examination.

Horticultural Values

Any question under this heading can be solved and proper satisfaction given.

Care Taken of Estates or Greenhouses

Whether on account of absence from home or not wishing to have the worry and care of an Estate, I would be pleased to undertake the management of same, so that the owner would not have the worry which would mar the pleasure derived from a country estate.

Gardeners or Superintendents

Having personal acquaintance with a large number of competent and reliable men, I would be pleased at any time to recommend to any ladies or gentlemen such gardeners or superintendents who I am sure would give satisfaction and results that might be expected from any outlay on a country estate or greenhouse.

Remodeling and Improvement of Estates

Old estates that have been neglected can be remodelled and improved so they would make an even more charming effect than the new ones, as they have more grown-up specimens which helps in making immediate effect.

I would be pleased at any time to undertake such work.

Building of Greenhouses and Conservatories

Conservatories and greenhouses should be built not only for their appearance but mainly for the practical purposes for which they are intended, so that the plants will thrive and give results.

I would be pleased to furnish plans, specifications and erect glass structures of any description. Also furnish such stock as would be desired to grow in same and see to the proper placing of same.

Professional Charges

Charges for professional services can never be stated beforehand, as same are governed entirely by the time the contemplated improvements will take; also the necessary time for making plans, specifications and so on, and on this account such charges could always be arranged at the first interview after the property has been seen and the owner consulted regarding his wishes.

Best Way to Obtain Results and Pleasure

Where the owner is a busy man and cannot give his time to the details of the work pertaining to the layout of the place, I would be glad to make an arrangement by which I would take the entire contract and charge of the work, so as to take this burden off the shoulders of the owner and be able to guarantee the result not only until the place is completely finished, but to make an arrangement by which I could have the supervision of the same for a year or two, os as to see that the work done is prpoerly carried on and everything is taken care of in the best way so that the work begun would not be marred.

In this way a country place would be to the owner what it should be, a source of pleasure rather than one of annoyance and worry.

The Two Seasons for Landscape Gardening

From the first of March to the end of June, and from the beginning of September to the end of November, are the two busy seasons of the landscape gardener to carry out the practical work, and, therefore, any preliminary arrangements, such as surveying, making out plans, estimates, etc., should be done before the busy season commences so as to be ready for operation when the season is proper for such work, and when there is more time to prepare plans and give them thorough thought in regard to all contemplated improvements.

Avoid Delays

Therefore, do not wait until it is time to begin the work, but make arrangements ahead, so that nothing would suffer on acount of a late beginning.

On receipt of this booklet, please write me and your needs will be attended to by Yours respectfully,

ALBERT A. MANDA,

Landscape Architect,

South Orange, N. J.

Deciduous Trees

This class embraces species growing from ten to over a hundred feet in height, and furnishes ample material for street and avenue planting, as well as for parks and home grounds, where, with their large, spreading branches, they give restful shade in summer. The various shapes and hues of the foliage, together with the profusion of flowers produced by many varieties, give a characteristic and imposing effect to the grounds. Prices are given for fair-sized stock. Larger specimens, prices on application.

Acer polymorphum reticulatum. Deeply cut palmate foliage, beautifully veined with	1.00
light green color	1.00
June. One of the best	1.00
Acer polymorphum. Collection of 25 varieties. These comprise all the sorts of this	
grand plant, and the many forms are very interesting when planted together Acer, rubrum (Red or Scarlet Maple). A large tree with spreading branches	1.00
Acer, saccharinum (Sugar or Rock Manle). A stately tree of nyramidal growth.	1.00
Acer saccharinum (Sugar or Rock Maple). A stately tree of pyramidal growth. Especially valuable for avenue planting Aesculus hippocastanum (White flowered Horse Chestnut). Forms a large sized tree. Very hardy. In May it is covered with large spikes of white flowers	1.00
Aesculus hippocastanum (White flowered Horse Chestnut). Forms a large sized	4 00
tree. Very hardy. In May it is covered with large spikes of white flowers	1.00 1.00
Aesculus hippocastanum plenum. Produces double flowers	1.00
Ailanthus, glandulosa (Tree of Heaven). A rapid growing tree from China	1.00
Ailanthus, glandulosa (Tree of Heaven). A rapid growing tree from China Asimina, triloba (Pawpaw). A low tree, flowers brown, fruit oblong, yellow, at maturity dark brown, the flesh sweet and luscious	
Betula alba (White Birch). A graceful tree with silvery bark, assuming an	.50
elegant, drooping habit	1.00
Betula alba atropurpurea. Very vigorous habit, and purple foliage	1.00
Betula alba pendula. A weeping form of the above	1.00
branches, covered with delicately cut foliage, make it admired wherever seen	1.00
Broussonetia, papyrifera (Paper Mulberry). A tree with a broad round head	1.00
Carpinus, Betulus (European Hornbeam). A hardy and very ornamental tree	1.00
Carpinus, Caroliniana, American Hornbeam. A bushy tree with a dense round head Catalpa, bignonioides (Indian Bean). A tree with showy flowers	1.00 1.00
Catalra, bignonioides aurea, Golden Catalpa. A form with yellow foliage	1.00
Catalpa Bungeii dwarf. A small growing form. Foliage large and glossy	.50
Catalpa Bungeii standard. This variety grafted on stems of tall varieties makes an effective umbrella-shaped tree for formal effect	
Catalpa speciosa. A very vigorous hardy variety, large clusters of white flowers	2.00 1.00
Celtis, occidentalis (Nettle Tree or Sugarberry). A handsome tree, spreading	1.00
Cerasus, pendula. Japanese weeping or Rose-Bud Cherry. A small tree with droop-	
ing branches. Flowers literally covering the branches, rose-pink	2.00
producing double white flowers	1.00
Cerasus Sieboldi rosea plena. Flowers a beautiful shade of pink.	1.00
Cercidophyllum Japonicum. A Japanese tree having small leaves, and when starting	
from the bud are of a light pink color, giving the tree a beautiful appearance Cercis Canadensis (Judas Tree). A native tree of medium size, flowering before the	1.00
foliage appears. Very beautiful.	1.00
foliage appears. Very beautiful. Chionanthus Virginicus (White Fringe). A dwarf tree, producing racemes of pure	
white powers, with tringe-like petals	1.00
Cladrastis tinctoria (Yellow Wood). One of the finest flowering trees. Leaves light green, flowers produced on long, drooping racemes, white and sweet scented	1.00
Cornus florida (Dogwood). Too well known to need any description. A beautiful	1.00
tree in spring or fall. Large white flowers, red fruit	1.00
Cornus florida pendula. A variety of C. florida, with drooping branches	1.00
to the above, the plant howers when very young	2.00

Deciduous Trees-Continued Each	From
Crataegus, cordate (Washington Thorn). A small tree with a round-topped head.	
Flowers white, fruit scarlet, lustrous, persisting	
Crataegus oxycantha (Hawthorn). The celebrated English hedge plant	.35
Crataegus oxycantha alba plena. Flowers double white	1.00 1.00
Crataegus oxycantha Paul's scarlet. Flowers bright carmine red. Superior to any. Crataegus oxycantha rosea plena. Luxuriant foliage. Flowers large, very double,	1.00
and of a beautiful rose color.	1.00
Diospyros, Virginiana (Persimmon). A sharely tree with spreading branches. Fruit	
an inch or more in diameter, pale orange-yellow	.50
Fagus ferruginea (American Beech). One of the finest native trees, growing to	1.00
immense size. Rich glossy foliage	1.00
Fagus sylvatica asplenifolia. Elegant round habit. The leaves are delicately cut,	
giving it a fern-like appearance	2.00
Fagus sylvatica pendula (Weeping Beech). A very interesting pendulous tree, with	
rich foliage of wondrous beauty	2.00
Fagus sylvatica purpurea. An elegant tree. Foliage in Spring deep purple, changing to purplish green in Fall	2.00
Fagus sylvatica purpurea pendula. Similar in habit and growth to the Weeping	
Beech. Foliage deep purple	3.00
Fagus sylvatica purpurea Riversii. Compact habit. Foliage crimson in early spring.	
The finest of all purple trees	2.00
Fagus sylvatica tricolor. A grand variety with beautiful rose-margined leaves Fraxinus, Americana (White Ash). A lofty tree with spreading branches	2.00 1.00
Fraxinus excelsior (European Ash). A noble tree, of rapid growth, gray bark,	1.00
ninnate leaves, and black buds	.50
Fraxinus excelsior pendula (Weeping Ash). One of the finest lawn and arbor trees.	1.00
Gleditsia, triacanthos (The Honey Locust). A large spiny tree with spreading,	
somewhat pendulous branches	
Hicoria, pecan (Carya olivaeformis). A large tree with spreading branches, cul-	1.00
tivated largely for its nuts	
Juglans Japonica. (The Japanese Walnut). One of the most rapid growing trees	1.00
Juglans, nigra (Black Walnut). A noble tree with a symmetrical round crown	1.00
Koelreuteria, paniculata (Varnish Tree). A small tree, flowers yellow, borne in	2.00
large terminal panicles	
glossy green leaves, turning to deep crimson in autumn	1.00
Liriodendron tulipifera (Tulip Tree). Allied to the Magnolias. Vigorous grower,	
producing beautiful tulip-like flowers	1.00
Magnolia acuminata. A beautiful pyramidal tree, with large bluish green leaves.	4 00
Flowers yellow tinted, with purple	1.00
and produced before the leaves.	2.00
Magnolia glauca. Thick, almost evergreen, foliage, with white, fragrant flowers	1.00
Magnolia Hypoleuca. Rapid growing tree, large foliage	
Magnolia Kobus. Medium size, bushy growth. Blush white, fragrant	
Magnolia macrophylla. Leaves two feet in length. Flowers white, of immense size.	2.00
A fine tropical looking tree.	2.00
Magnolia obovata discolor. Profuse bloomer, white, reddish pink flowers	
Magnolia purpurea. Medium sized flower, rose purple color	
Magnolia parviflora. Rare Japanese variety. White, with purple centre	
purple, cup-shaped. One of the best	2.00
Magnelia stellata. The earliest flowering form, dwarf habit, with pure white semi-	
double fragrant flowers in great profusion	2.00
Magnolia tripetala. Very hardy type, with immense leaves and large white flowers	1.00
Malus, floribunda (Flowering Crab). A shrub or small tree. Flowers rose or rose-	1.00
red, produced in great profusion.	
Malus, floribunda Parkmani, M. Halleana (Parkman's Crab). A form with beau-	
tiful semi-double rose-colored flowers	1.00
Malus, floribunda Schiedeckeri (Double Flowering Crab). Flowers double, bright	1 00
rose, of great substance and durability	1.00
tree, flowers large and very double, resembling small roses, delicate pink or blush	
Mespilus. Germanica (Medlar or Mespil). A small bushy tree often grown in the	
Old World for its acid fruits. Flowers large, white	1.00
Mohrodendron, Carolinum (Halesia tetraptera) (Silver Bell). A tree bearing a wealth	
of drooping white flowers in early spring	
Morus Teas Weeping. One of the finest small weeping trees. Forms a perfect	
umbrella-shaped head. Very hardy	1.00
Oxydendrum, arboreum (Sourwood). A small tree. Flowers borne in panicles	
resembling Lily-of-the-valley flowers. Pure white	1.00

Deciduous Trees—Continued	
Each I	From
Paulownia imperialis. A tropical looking tree, of rapid growth, and surpassing	
all others in size of leaves, often over a foot in diameter	
Persica vulgaris alba fl. pl. (Flowering Peach). Flowers pure white and double.	1.00
Persica vulgaris coccinea pl. Flowers double, bright red	1.00
Persica vulgaris rosaflora. Flowers double, pink	1.00
Persica vulgaris rosea pl. Flowers double, rose colored	1.00
Platanus orientalis (Sycamore). Extensively used for street and park planting	1.00
Populus alba (Poplar). Rapid growth and wide spreading habit. Leaves large,	
green above and white beneath	1.00
Populus aurea. Fine yellow foliage, retaining its brilliancy through the season.	
Effective in masses of foliage planting	1.00
Populus monolifera (Carolina Poplar). Pyramidal in form, very vigorous in	
growth. Leaves large, glossy, deep green	1.00
Ptelea trifoliata (Hop Tree). Small tree, vigorous grower. Fruit winged	1.00
Ptelea trifoliata aurea. Beautiful, glossy, golden foliage	1.00
Prunus Pissardii (Purple leaved Plum). The finest purple leaved tree or shrub.	
Leaves are a lustrous crimson when young, changing to a dark purple	.75
Pyrus spectabilis (Flowering Crab). One of the finest flowering trees	1.00
Pyrus spectabilis fl. alba pl. Double white, fragrant flowers, borne in clusters	1.00
Pyrus spectabilis fl. rosea pl. Same as above. Flowers rose color	1.00
Quercus alba. Large, spreading tree good for any purpose	1.00
Quercus coccinea (Scarlet Oak). Rapid grower, pyramidal outline. Leaves turn	
bright scarlet in autumn	1.00
Quercus, macrocarpa (Bur, or Mossy Cup Oak). A majestic tree, spreading	2.00
Quercus palustris (Pin Oak) A fine, vigorous tree of drooping form. One of the	
best for planting avenues	1.00
Quercus, pedunculata (Q. robur). English Oak. A large tree, spreading	2.00
Quercus, pedunculata concordia (Golden Oak). A form of the above with leaves	
of bright yellow color	2.00
Quercus, rubra (Red Oak). A large and handsome tree with a symmetrical crown.	2.00
Robina, Pseudo-Acacia (Black Locust). Leaves compound, bright green. Flowers	
white, very fragrant	.50
Robinia hispida rosea (Locust). A native species of irregular growth, producing	
clusters of rose-colored flowers in June	1.00
Salix Babylonica (Weeping Willow). Our well known willow	.50
Salix laurifolia. Ornamental tree, with large, shining leaves	.50
Sophora, Japonica (Japanese Sophora). A medium sized tree with spreading	
branches forming a symmetrical compact head	1.00
Sophora, Japonica pendula (Weeping Sophora). Most beautiful of pendulous trees.	2.00
Sorbus, Americana (American Mountain Ash). Flowers white, followed by clusters	
bright scarlet fruit	1.00
Sorbus, aucuparia pendula (Weeping Mountain Ash). A form with large and	
slender branches, grafted on straight upright stems. Bright red berries	2.00
Tilia Americana (Linden). A rapid growing, large sized native tree. Large leaves,	
fragrant flowers	1.00
Tilia argentea. Particularly noticeable among trees by its white appearance	1.00
Tilia, dasystyla (Crimean Linden. A handsome tree with a pyramidal head	1.00
Tilia Europaea. A fine, pyramidal tree, with heavy foliage and clusters of flowers.	1.00
Tilia pendula. A beautiful tree with large foliage and slender, drooping branches	2.00
Toxylon, pomiferum (Maclura aurantiaca) (Osage Orange). A handsome hardy	
tree, fruit light yellow-green	.50
Ulmus Americana (Elm). The finest of all our native spreading trees	
Ulmus pendula. A fine and graceful weeping tree	

Besides the stock here enumerated and priced we have many other rare kinds, as well as large specimens, of which we would be happy to give prices on application or have you call and select same.

Deciduous Flowering and Foliage Shrubs

This class is represented by a very large class of shrubs growing from two to ten feet in height. Producing a wealth of beautiful flowers at the different seasons, or a mantle of bright colored foliage, making an attractive mass from early spring to late fall. Indispensable for every garden, however small.

Each r	LOIII
Aesculus, parviflora (Dwarf Horse Chestnut). Flowers white, in narrow spikes	\$1.00
Amorpha truticosa. The flowers are of an unusual dark violet purple	.35
And penale and are a Producing language of an unusual dark violet purple

Deciduous Flowering and Foliage Shrubs—Continued	-
Each	From
Paeony arborea (Tree Paeony). Flowers very large and gorgeous, appearing in May.	
Many varieties. See under Japanese specialties	\$2.00
Philadelphus coronarius (Syringa or Mock Orange). A well known shrub, producing	
white, sweet-scented flowers	.35
Philadelphus foliis aureus. A medium-sized golden-leaved variety	.50
Philadelphus grandiflorus. Large showy flowers, slightly fragrant	.35
Philadelphus Inodorus. Large White flowers	.35
Philagelphus Lemoineil. Growth upright with small white flowers	.50
Potentilia, fruiticosa (Shrubby Cinquefoil). Flowers numerous, bright yellow	.50
Prunus triloba (Double flowered Plum). A grand hardy shrub. Flowers double, of	
a delicate pink color, thickly set on long, slender branches	.50
Rhodotypus kerrioides. Medium-sized shrub, handsome foliage and single white	
flowers, succeeded by small fruits	.35
Rhus cotinus (Purple Fringe or Smoke Tree). Produces a curious fringe or hair like	
flowers, that covers the whole plant	.50
Rhus glabra laciniata. A striking plant with deep laciniated leaves resembling	.00
fern leaves, turning to a rich crimson in autumn	.50
Ribes aureum. A shrub with shining leaves and yellow flowers	.35
Sambucus nigra aurea (Golden Elder). Golden yellow foliage	.35
	.35
Spiraea Billardii. Flowers nearly all summer	.55
	25
duced during mid-summer and autumn	.35
Spiraea Bumalda Anthony Waterer. Dwarf variety, with dark crimson flowers.	.35
Spiraea opulifolia aurea. A beautiful golden yellow foliage	.35
spiraea prunifolia pl. Pure white flowers, like white daisies. Keeps in flower long.	.35
Spiraea Reevesii. A fine shrub, producing large clusters of pure white flowers	.35
Spiraea Reevesii fl. pl. A double flowering variety of the above	.35
Spirace Thunbergii. Dwarf and graceful, branches slender and drooping.	
Flowers white, One of the first to flower in spring	.35
Spiraea Van Houtteii. One of the best shrubs, Strong grower. Very hardy.	
Covered in May and June with a mass of large white flowers	.35
Stephanandra, flexuosa (Stephanandra). Flowers white, feathery	.35
Stuartia, pentagyna (Alleghany Stuartia). Flowers white, large and showy	1.00
Stuartia, racemosus (Snowberry). A graceful shrub. Berries white, long, persistent	.35
Styrax Japonica. Large shrub, with small glossy foliage and beautiful drooping	
pure white snowdrop-like flowers	1.00
Syringa Persica (Persian Lilac). Produces purple flowers, drooping branches	.50
Syringa vulgaris. The well-known Lilac. Bluish purple	.50
Syringa vulgaris alba. A white form of the above	.50
Syringa vulgaris alba grandiflora. Very large pure white trusses	.50
Syringa vulgaris Charles X. A strong, rapid growing variety, with large, loose	
trusses of reddish purple flowers	.50
Syringa vulgaris Marie Legraye. Large white panicles, best var	.50
Tamarix Africana. Handsome foliage, upright habit	.35
Tamarix Germanica vera. Foliage a glaucous green	.35
Tamarix Indica. Delicate foliage of a lively green color	.35
Viburnum plicatum. One of the most desirable flowering shrubs. Fine habit and	
foliage. Globular heads of pure white flowers	.50
Weigela amabilis. Flowers light pink. Very free	.35
Weigela amabilis alba. Pure white form of the above	.35
Weigela foliis variegatus. A grand variegated leaved shrub	.35
Weigela rosea. Producing fine rose colored flowers	.35
Weigela variabilis. Brilliant crimson. A vigorous grower	.35
Zanthorhiza apiifolia. Dwarf compact shrub, with fern-like leaves and yellow	.00
flowers. Good for shady situation	.35

We have the largest and finest stock of Shrubs in America, and can give you good value in good plants with fine masses of fibrous roots. Call and see our Nurseries.

Bank of Rhododendron Maximum at South Orange, N. J.

Evergreen Foliage and Flowering Shrubs

A most desirable class of plants, with massive generally glossy foliage, which is evergreen through the winter, the foliage changing in many varieties to beautiful bronze purple and crimson hues, besides the fine and attractive flowers which are produced in spring and early summer, and on that account should be planted in every garden.

Lach l	From
Abelia rupestris. Beautiful dwarf shrub, with small, glossy foliage covered	
with white flowers in late summer	\$0.50
Andromeda Catesbaeii. A grand, glossy-leaved plant, bearing white flowers. The	
foliage during fall turns a beautiful crimson, making it most effective for winter	.50
Andromeda floribunda. A pretty plant of dwarf compact habit, dark green foliage	4.00
and pure white flowers in spring	1.00
Andromeda Japonica. A taller shrub, sprays of white flowers	1.06
Artemisia abrotanum (Old Man, or Southernwood). Dark green foliage	.25
Azalea amoena. A neat, low growing shrub. The foliage is small, dark green, turn-	
ing to bronze red in winter. In early May it is covered with a mass of purplish red flowers. One of the best early flowering plants	1.00
Azalea Indica alba. Flowers pure white, borne in great profusion	2.06
Azalea Oriental Hybrids. In several colors. See page —	1.00
Berberis aquifolium (Mahonia). An upright dwarf shrub, with glossy green foliage,	1.00
turning to a beautiful shade of purple in winter	.50
Berberis fascicularis. A variety with more crested foliage	.50
Berberis Neubertii. A hybrid variety, with small, crenate foliage	.50
Buxus sempervirens arborea. The tall growing variety	1.00
Buxus sempervirens arborea variegata. A variegated form	
Buxus sempervirens longifolia. Variety with elongated foliage	1.00
Buxus sempervirens longitional variety with elongated for age	1.00
Buxus sempervirens pyramidalis. Upright habit	1.00
formal gardens, in all sizes from	.05
Calluna, vulgaris (Scotch Heather). Flowers in great profusion, pink or rosy-pink	.50
Calluna vulgaris alba (Heather). Fine feathery foliage covered with masses of small,	.50
white flowers in late summer	.50
Calluna, vulgaris alba (White Flowered Scotch Heather). A form with white flowers	.50
Twelve other varieties in stock	.50
Cassandra calyculata. Dwarf shrub, with white flowers	.50
Chamaedaphne, calyculata (Cassandra calyculata) (Leather-Leaf). Flowers white	.00
at first approach of spring	.50
Cotoneaster, buxifolia. Dwarf shrub, with small, glossy feathery foliage	.35
Cotoneaster Microphylla. Dwarfer variety, with smaller foliage	.35
Daphne Blagayana (White Garland Flower). Flowers white, fragrant	.50
Daphne cneorum (Garland Flower). Dwarf shrub, pink fragrant flowers	.50
Euonymus Japonicus. A beautiful glossy-leaved plant of upright habit	.35
Euonymus radicans arborescens. A dwarf, compact form, suitable for edging or as	
dwarf hardy shrub	.50
llex crenata. A dwarf Japan Holly. Perfectly hardy. For specimen or small hedges	.50
llex, glabra (Inkberry, or Winterberry). Leaves dark green, shining	.50 .50
llex opaca (Holly). The well known American Holly	.50
Kalmia latifolia (Mountain Laurel). Shining foliage, dense clusters of pink or nearly white flowers in spring	1.00
Leiopyhllum buxifolium. Dwarf shrub, covered with white flowers	.50
Leiophyllum buxifolium prostratum. A prostrate variety of the above	.50
Rhododendron Catawbiense. Hardy variety, producing freely large trusses of lilac	•••
purple flowers. The true Rhododendron color	2.00
Rhododendron maximum. The hardiest species, with massive foliage, covered with	
trusses of white to pale rose flowers in July	1.00
Rhododendron hybrids. We have a fine stock of the best selected twelve hardy	
varieties, varying in color from pure white to dark scarlet	2.00
Rhododendron, hybrids. A. Lincoln, Crimson. Album elegans, Blush-white. Album	
grandiflorum, Blush-white, large flowers. Atrosanguineum, Blood-red. Caracta-	
cus, Rich crimson. Catawbiense album, white. Charles Bagley, Cherry-red.	
Charles Dickens, Dark scarlet. Everestianum, Rosy lilac. President Lincoln,	
Soft rose. Roseum elegans, Rose. Roseum superbum, Light rose. Fine stock in all sizes \$2.00 each and upward.	

Rhododendrons and Kalmias by the car load in any size and quantity.

This class and the Conifers are the only plants that give you the all-year-round "green effect"

Some Specimen Boxwoods at South Orange, N. J.

Buxus Suffruticosa (The Dwarf or English Box)

This variety is generally used for edging flower beds or walks, or for geometrical outline. It is of very slow growth and stays small and dwarf for years and years. However, if allowed to grow from fifty to two hundred years, it forms a grand bush, giving unusual tone to the garden not only as to beauty, but giving the whole surroundings age and finish. The large specimens are very scarce, and where a few of these could be used it certainly will make an effect not obtainable by any other plants.

Grand	Centenaria Each	n Specimens 3 foot specimens, very old and fine.	Each \$18.00

Buxus Sempervirens or Tree Box

One of our finest broad leaf Evergreen plants, hardy in most parts of the country and does fine especially if sheltered from the hot suns of the winter. This species could be used for innumerable purposes; the small plants for hedging, while the large plants could be used for larger hedges, or specimen plants either planted on the lawn, in the garden, in tubs or planted in vases, while the extra large specimens are choice plants that any garden can be proud of. The fan-shaped and sheared specimens add quaintness and interest when used in formal gardens.

Natural Bush

These are plants grown naturally as the plant elects and forms broad, round head bushes which can be used for innumerable purposes and are the easiest to take care of.

We have a beautiful old hedge 500 feet long from three to five feet in height, and from four to six feet in diameter. This hedge must be close to one hundred years old and would make a grand effect along a walk or a drive leading to a colonial residence or as a hedge around a choice flower garden.

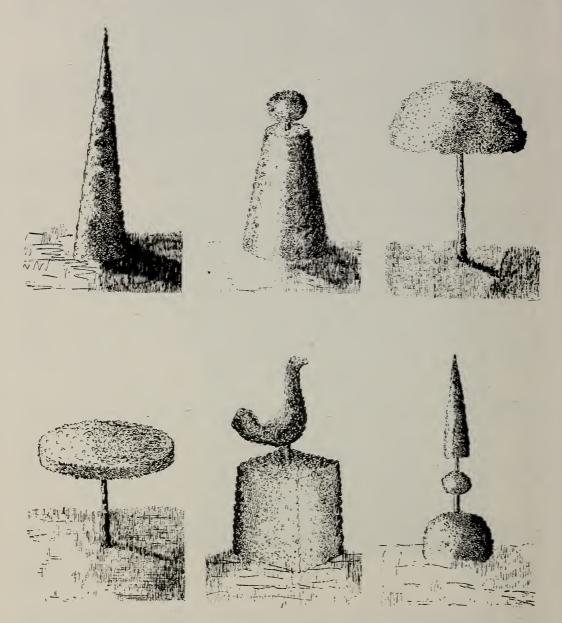

Fancy Sheared and Trimmed Boxwood

Boxwood is a plant that adapts itself to be trained in endless shapes and forms and makes a choice object to stand in a prominent position, either in a flower garden or terrace

or near residences.

We will be pleased to send sketches of these to intending purchasers and would be pleased to supply these anywhere from \$10.00 to \$100.00 apiece, according to the size and beauty of the specimen.

THESE AND MANY OTHER FORMS, PRICE ON APPLICATION

Hardy Herbaceous Plants

These are the old-time favorites found in every old-fashioned garden—plants that have been neglected for a number of years, but which of late are receiving again the proper recognition due them on account of their many good qualities.

In the first place, they are inexpensive plants, not only in their original cost, but considering that when once planted they grow and increase from year to year, while the cost of maintenance is very slight.

With a good assortment of Hardy Perennials a continuous show of flowers can be kept from the early spring until the frost cuts down all vegetation. With a judicious selection of these plants, not only can flower beds and borders be made attractive, but when proper kinds are chosen the ponds and marshes can be turned into objects of admiration. Barren rocks and sand hills alike can be made beatiful, while, if planted in an informal, careless way, the pleasing effect of a wild garden is produced.

CULTURE.—The best time for planting Hardy Herbaceous Plants is from March to

May, and from September to November. They require good, rich loam to grow them to perfection, while if the soil is perfectly grained, no protection is needed in the winter,

with the exception of a slight cover to prevent the sudden thawing and freezing.

In the following list, only such varieties are given as we have found from long experience to be of real merit.

experience to be of real merit.		
		Each
Acanthus, mollis, latifolius (Bear's Breech). Spikes	of rose-colored flowers	\$0.25
Achillea, Boule de Neige. An improvement on Th	he Pearl	.15
Achillea, Eupatorium (Yarrow). Finely cut foliage	e. brilliant vellow flowers	.15
Achillea, Filipendula. Showy species with golden	vellow flowers	.15
Achillea millefolia rubra. Pretty rose colored flow	ers easy grower	.20
Achillea serrata plena. "The Pearl." Pure white fl	owers all summer	.15
Achillea tomentosa. Fine for rockwork, yellow, of		
Aconitum, Fischeri. Dwarf variety with very large		
Aconitum I vacatanum A from flowering role we	llow	
Aconitum, Lycoctonum. A free-flowering pale ye	ant blue flowers	.25
Aconitum, Napellus (Helmet Flower). Large, da	ark blue nowers	.25
Aconitum, Wilsoni. Recent introduction from Chin	a, light violet-blue nower	
Adonis, Amurensis (Bird's Eye). Large, single yel		.50
Adonis, Amurensis fl. pl. Large, double yellow f	lowers	.50
Aegopodium, Podagraria variegata (Bishop's Weed)	. Green and yellow foliage	.15
Agrostemma coronaria (Rose Campion). Pink flower	rs	.20
Agrostemma, Flos Jovis (Rose Campion). Deep pink		.15
Ajuga Genevensis. Suitable for rockwork or fine for	r shady places	.15
Ajuga reptans. Blue flowers, compact grower		.15
Aiuga, reptans rubra (Bugle). Spikes of purplish-b	lue flowers, foliage dark	.15
Althaea rosea (Hollyhock). Single, extra fine var		.20
Althaea rosea. Fine double varieties. All colors, se		.15

Anemone Japonica alba. A white form of the above.		.20
		.30
Anemone Japonica, Kriemhilde. Semi-double flowe		
Anemone Japonica, Queen Charlotte (Japanese Win		.15
Anemone Japonica rosea. A beautiful pink variety.		.25
Anemone Japonica Whirlwind. Double white		.25
Anemone Pennsylvanica. Pretty white flowers		.15
Anemone sylvestris. Pure sating, white flowers		.25
Anemones, Pulsatilla (Windflowers). Produces viole	t flowers, plant for the rockery.	.15
Anemonopsis, macrophylla. Hardy Perennial from Anthemis, tinctoria (Marquerite). Large golden-vel	Jaran. Rich violet flowers	.50
Anthemis, tinctoria (Marquerite). Large golden-vel	low flowers	.15
Anthericum, Liliastrum (St. Bruno's Lily). Spikes	of large white flowers	.25
Aquilegia Canadensis. Scarlet and yellow, early		.15
Aquilegia, Californica Hybrida. Flowers vellow. p		.15
Aquilegia chrysantha. Bright primrose yellow		
Aquilegia, coerulea (Rocky Mountain Columbine).	Bright blue and white	.15
Aquilegia, Flabellata nana alba. Pure white of dwar	f growth	15
Aquilegia hybrids, finest assorted. The very best var	rieties	20
Aquilegia, Vulgaris (Common Columbine), Violet-b	elue: vigorous grower	15
Aguilegia vulgaris alba. White flowers, useful		15
Arabis, alpina (Rock Cress). Forming a dense carr	oet with pure white flowers	15
Arabis, alnina flora pleno. A distinct and pretty do	uble flowering form	25
Armeria cephalotes. A very beautiful variety		25
Armeria maritima (Sea Pink). Pretty rose flowers		.20
Armeria, maritima Alba (Thritt), Prefty White.		.15
Armeria, maritima Splendens (Thrift). Bright rosy	pink	.15
Anmania plantaginea. Broad foliage, rose flowers		95
Artemisia Abrotanum (Old Man). Shrubby plant		20
Artemisia Ludoviciana. A training species, silvery i	onage	.15
Artemisia pontica, Well adapted for carpet bedding	,	.10

HARDY HERBACEOUS PLANTS—CONTINUED

	\$0.15 .25
Arundo donax. Tall, stately glaucous leaves. Arundo donax fol. var. Beautifully variegated leaves.	.35
Asclepias, incarnata rosea (Butterfly Weed). Pretty rosy-flesh colored flowers	.15
Asciepias tuperosa (Butterfly Weed) Orange red flowers	.20
Asier, Many Varieties for wild gardene. The heat corts only	.10
Aster Nova Angliae. Purple with orange contro	.15
Astilbe Arendsi, Ceres. Delicate, light rose-colored flowers with silvery sheen Astilbe Arendsi, Pink Pearl. Bright silvery pink	.35
Astilbe Arendsi, Pink Pearl. Bright silvery pink	.35
Astilbe Arendsi, Salmon Queen. Graceful, beautiful salmon pink	.35
Astilbe Arendsi, (Venus). Similar to Ceres, but of bright, deep violet-rose color Astilbe Arendsi, Vesta. Very graceful plumes of light lilac rose	.35
Asimoe, Davidi. Pretty dark-green foliage plumes of deep rose-violet	.25
Astine, grandis. Companion to A. Davidi, panieles of white flowers	.25
Daptisia, australis (False Indigo). Dark green foliage, spikes of dark blue flowers	.15
Baptisia, tinctoria. Spikes of bright yellow flowers	.15
Bletia Hyacinthina. A terrestrial Orchid, showy rosy-pink flowers Bocconia cordata. Large cordate leaves	.15
Boltonia asteroides. Tall, mass of white flowers	.15
Boltonia latisquama. Flowers of beautiful blue color	.15
Boltonia, nana (False Chamomile). Similar to the type, but only two feet high	.15
Callirhoe, involucrata (Poppy Mallow). Large saucer-shaped flowers, rosy-crimson	15
Caltha, palustris (Marsh Marigold). Single bright yellow flowers	.15
Caltha, palustris fl. pl. Double flowering	.15
Campanula, Carpatica (Carpathian Hare-bell). A pretty species; flowers clear blue	.15
Campanula, glomerata (Clustered Bell-flower). Violet flowers	.15
Campanula, glomerata Superba (new). Produces showy violet-blue flowers	.25
Campanula, grandis. Saucer-shaped, rich violet-blue flowers	.25
Campanula Grosseki. Produces its dark-blue flowers all summer	.15
Campanula, lactiflora alba magnifica (New). Large white flowers	.50 .25
	.15
Campanula, latifolia macrantha. Large purplish-blue flowers; May and June Campanula Medium (Canterbury Bell). Choice, mixed	.20
Campanula persicifolia. Flowers pale blue, useful	.15
Campanula persicifolia alba. A white variety of above	.20
Campanula, punctata. Large bell-shaped flowers, white spotted, rose	.15
Campanula pyramidalis. An effective plant	.20 .15
Campanula, Trachelium (Coventry Bells). Purple flowers; June and July	.15
Cassia Marylandica (Senna). Yellow flower	.25
Centaurea, dealbata (Knapweed). Distinct bright rose-colored flowers	.15
Centaurea, macrocephala. Very large thistle-like golden yellow flowers	.15
Centaurea, montana (Perennial Corn Flower). Large violet-blue flowers	.15 .15
Cerastium, tomentosum (Snow in Summer). Low silvery foliage and white flowers.	.15
Chelone, glabra Alba (Shell Flower). Terminal spikes of creamy-white flowers	.25
Chelone, lyoni. Heads of showy purplish-red flowers	.25
Chrysanthemum, arcticum (The Arctic Daisy). Pure white flowers	.15
Chrysanthemum, Hardy Garden, in 25 varieties. All colors, see special list	.15
Chrysanthemum Leucanthemum Flore Pleno (new). Flower double white	.50 .15
Cimicifuga, Dahurica (Snake Root). Large spikes of creamy white flowers	.25
Cimicifuga, racemosa. Bearing in July spikes of pure white flowers	.25
Claytonia, Virginica (Spring Beauty). Low-growing plant, light pink flowers	.15
Clematis, Davidiana. Bright green foliage, tubular bell-shaped flowers	.15
Glematis integrifolia. Bells of blue flowers	.35
Clematis recta. Upright white Clematis. Fine	.35
Convallaria majalis (Lily of the Valley). Clumps	.25
Coreopsis delphinifolia. Compact plant, yellow flowers	.25
Coreopsis Harvest Moon. Bright golden yellow	.15
Coreopsis, lanceolata grandiflora. Flowers are a rich golden-yellow	.15
Coreopsis, verticillate. Masses of small golden-yellow flowers	.15
Coreopsis rosea. Flowers rose color, with yellow disc	
Delphinium, Belladonna. Turquoise-blue flowers	
Delphinium formosum (Larkspur). Rich blue, tinged purple	.15
	.15 .25 .20 .20
Delphinium Sinense (assorted varieties). Dwarf, free flowering	.15 .25 .20 .20
Delphinium Sinense (assorted varieties). Dwarf, free flowering Delphinium Sinense album. A pure white form of the above	.15 .25 .20 .20 .15
Delphinium Sinense album. A pure white form of the above Desmodium penduliflorum. Late Flowering plant	.15 .25 .20 .20 .15 .35
Delphinium Sinense (assorted varieties). Dwarf, free flowering Delphinium Sinense album. A pure white form of the above	.15 .25 .20 .20 .15

HARDY HERBACEOUS PLANTS-CONTINUED

Dianthus, latifolius atracoccineus (Hybrid Sweet William). Crimson flowers	\$0.15
Dianting, latining at acoccineus (1990) to over will all (1990)	.20
Dianthus plumarius albus. White form	.20
Dianthus nlumarius rienus. Double garden nink	
Dianthus superbus. A very handsome variety	.20
Dicentra eximea. Rose colored flowers	.20
Dicentra eximea. Rose colored nowers	.20
Dicentra spectabilis (Bleeding Heart). Flowers heart-shaped	
Dictamnus, Caucasicus. A gigantic form with flowers double the size of the type	.25
Dictamus Fraxinella. Fine spikes of purple flowers	.25
Dictamus Fraxinella. Fine spikes of purple howers	.25
Dictamus Fraxinella alba. White variety of above	
Dielytra or Dicentra formosa (Plumy Bleeding Heart). A dwarf species	.15
bidital Clauding (Favelers) We offer them in white purple like rose	.15
Digitalis, Gloxiniaenora (Foxglove). We offer them in white, purple, mae, rosetti	.15
Digitalis purpurea (Foxglove). Ornamental in varieties	
Doronicum, Caucasicum (Leopard's Bane). Very free-flowering, bright yellow	.25
Doronicum, Clusii. Rich yellow; 2½ to 3 inches across	.25
Doronicum, Clusii. Rich yellow; 2½ to 3 inches across	
Doronicum, excelsum. Large orange-yellow; 3½ inches across	.25
Echinacea purpurea. The purple Cone Flower	.25
Pulling and the pulling of charge	.35
Echinacea purpurea hybrida. Fine varieties of above	
Echinops, Ritro (Globe Thistle). Thistle-like deep metallic blue flowers	.25
Epimedium, alpinum (Barren-wort). Crimson and yellow	.25
Epimedium, aipinum (Barren-wort). Crimsbir and yone with	.25
Epimedium, niveum. Dwarf, early, pure white	140
Epimedium, sulphureum. Fine yellow	.25
Enimona - necisione recent (Flor Rene) Targe rest flowers Time to August	.25
Erigeron, speciosus roseus (rica bane). Darge rosy nowers, June to August	
Eryngium amethystinum. A grand plant for shrubberies	.15
Eryngium, maritimum (Sea Holly). Deeply cut pale blue foliage and flowers	.25
Fulcia Ispanica fal yan Tall arramental grass	.25
Eulalia Japonica fol. var. Tall ornamental grass	
Eulalia Japonica Zebrina. Variety with small striped foliage	.25
Eulalia univittata (gracilis). Compact plant	.25
Evanue and anna Time avenuen avenue	.15
Euonymus radicans. Fine evergreen creeper	
Euonymus radicans arboreus. Upright form, desirable	.25
Euenymus radicans fol. var. Fine variegated form	.15
Parties And tribe (The descent of the courting	.15
Eupatorium, Ageratoides (Thorough-wort). White flowers for cutting	
Eupatorium, coelestinum. A pretty, hardy plant with light blue flowers	.15
Eupatorium, purpureum Maculatum (Joe Pye Weed). Deeply colored form, purple.	.15
Euphorbia corollata (Flowering Spurge). Fine for cutting white flowers	.20
Euphorbia corollata (Flowering Spurge). Fine for cutting white howers	
Euphorbia, Cyparissias (Milk Wort). Cypress-like foliage, yellow flower-like bracts.	.15
Euphorbia, polychroma. Beautiful in spring when it bears masses of yellow	.25
Cathon Dayon blue grown	.25
Festuca glauca. Dwarf blue grass	
Funkia, coerulea (Plaintain Lily). Blue, broad green leaves	.15
Funkia cordata (Day Lily). Leaves ovate, flowers blue	.20
Funding around iffers Theyrone many writing larger	.20
Funkia grandiflora. Flowers pure white, large	
Funkia Fortunei. Large yellow and green foliage	.15
Funkia lanceolata. Narrow leaves, white flowers	.15
	.15
Funkia, undulata media picta. Green and white foliage; purple flowers	
Funkia undulata variegata. Beautiful variegated leaves	.20
Gaillardia grandiflora hybrida. (Blanket Flower). Flowers all summer	.20
Continue Andrewsii (Blue Continue)	.25
Gentiana, Andrewsii (Blue Gentian). Flowers fine blue	
Gentiana, scabra. A Japanese species	.50
Geranium, grandiflorum album. Pure white variety of above	.15
Garanium anandiflanum (Canada Bill) Dala lilaa klus flantagar ana fast	.15
Geranium, grandiflorum (Crane's Bill). Pale lilac-blue flowers; one foot	
Geranium sanguineum. Dwarf, crimson flowers	.25
Geum coccineum (Avens), Brilliant scarlet flowers	.15
Geum, Mrs. Bradshaw. A new scarlet. Blooms greater part of summer	.25
Gillenia, trifoliata (Bowman's Root). White flowers tinged with pink	.25
Glechoma hederacea variegata. Trailing variegated plant	.15
Gypsophila, acutifolia (Baby's Breath). Strong-growing species, panicles, white.	.15
Gypsophila, cerasticides. Fine variety for rockery, small white flowers	.15
Gypsophila, cerasticides. Fine variety for rockery, small white flowers	.20
Gypsophila, paniculata, flore plena (Double-flowering Baby's Breath). The pretty	
a proprinta, panieurata, ince piena (Double-nowering Daby's Dreatn). The pretty	
little double rosette-like flowers are produced through the summer	.25
Gypsophila, repens. An elegant trailing giant for the rockery, white flowers	.15
Helenium autumnale. Large yellow flowers.	.20
Helenium autumnale superbum. Tall yellow flowers	.15
Helenium, pumilum magnificum. Useful golden yellow blossoms all summer	.15
Helenium, Riverton Beauty, Rich lemon with nurnlish black cone	.25
Helenium, Riverton Beauty. Rich lemon with purplish black cone	
neienium, Riverton Gem. Old-gold changing to wallhower-red	.25
Helenium, rubrum (Sneeze Wort). Bright terra-cotta red; August and September.	.25
Helianthus Dowellianus. Small yellow flowers	.25
Helianthus Maximilianus. Fine, late variety	.20
Helianthus mollis grandiflorus. Chrome yellow, single flower	.25
Helianthus multiflorus (Perennial Sunflower). Large yellow flowers	.25
Helianthus multiflorus grandiplenus. Improved form	
	.20
Helianthus multiflorus plenus. Fine double flowers	.15

Polemonium coeruleum (Jacob's Ladder). Blue flowers	.20
Polemonium coeruleum album. White variety of above	.25 . 15
Polemonium, Richardsoni, Sky-blue flowers, with golden anthers: June-July	.18
Polygonum cuspidatum crispulum. Feathery white flowers	.36
Polygonum Sachalinse. Handsome bushy plant	.30 .20
Primula, veris superba (Primrose). A giant-flowered form, bright canary-yellow. Primula, vulgaris (English Primrose). The earliest spring flowers; yellow	.20
Primula, vulgaris (English Primrose). The earliest spring flowers; yellow	.15
Pulmonaria, angustifolia azurea (Blue Cowslip). The prettiest of the blue cowslips. Pulmonaria, saccharata Maculata (Lungwort). Foliage silvery, blue flowers	.25 .25
Pulmonaria, saccharata Maculata (Lungwort). Foliage silvery, blue flowers Pyrethrum roseum. Rose colored Daisy	.25
Pyrethrum roseum album. Pure white flowers	.25 .25
Pyrethrum roseum sanguineum Rich crimson flowers	98
Pyrethrum roseum, in assorted varieties	.25
Ranunculus, aconitifolius fl. nl. (Crow-foot) Flowers double pure white	.20 .15
ranunculus, ampiexicaulis. Dwarf, pretty single white flowers	.15
Ranunculus, repens fl. pl. (Bachleor's Buttons). Double bright golden vellow	.15
Rhexia, Virginica (Meadow Beauty). Rosy-purple blossoms	.15 .15
Rudbeckia Californica. Fine, pure yellow	.18
Rudbeckia fulgida. Orange yellow, disc dark purple	.20
Rudbeckia maxima (Cone-flower). Large yellow flowers	.35 .25
Rudbeckia speciosa. Yellow, dark purple disc	.20
Rudbeckia subtomentosa. Fine for borders	.26
Salvia, Pitcheri. Similar to the above, larger flowers, rich gentian blue color	.2
Salvia, Greggi. The brilliant carmine color is particularly bright from August on	.25
Santolina, chamaecyparissus Incana (Lavender Cotton). Silvery foliage	.10
Saponaria, Caucasica flore pieno (Double Bouncing Bet). White-tinted rose Saponaria, ocymoides (Soap-Wort). Masses of small bright rose flowers	.15

HARDY HERBACEOUS PLANTS—CONTINUED	Each
Saxifraga, cordifolia (Megasea). Light pink	
Saxifraga, peltata. For moist situations; large leaves, pink flowers	.49
Scabiosa, alba. A pure white variety	.25
Scabiosa, Caucasica (Blue Bonnet). Soft shade of lavender	.25 .15
Sedum album. Trailing white flowers	.15
Sedum, "Brilliant." Colored form of the preceding, being a bright amaranth red	.25
Sedum carneum. Trailing, pale rose flowers	.15
Sedum Fabarium (Stone Crop). Rosy pink flowers	.20
Sedum, Kamtschaticum (Stone Crop). Deep green foliage; yellow flowers	.15 .15
Sedum populifolium. Upright habit, white flowers	.25
Sedum, sexangulare. Dark green foliage, yellow flowers	.15
Sedum, Sieboldi. Round, succulent, foliage; bright pink flowers	.15
Sedum, spectabile. One of the best border plants	.20
Sedum spectabile rubrum. Fine deep colored flowers	.25 .1 5
Sempervivum (House Leek). Interesting plant. We furnish six distinct varieties.	.10
Senecio, Wilsonianus (Groundsel). Large cordate leaves, bright yellow flowers	.25
Shortia, galacifolia. Dwarf evergreen, bronzy-green foliage; flowers pure white	.25
Silphium, perfoliatum (Cup Plant). A tall growing, large yellow single flowers Solidago (Golden Rod), many varieties for wild gardens	.25
Solidago (Golden Rod), many varieties for wild gardens	.15 .35
Spigelia, Marilandica (Indian Pink). Brilliant red, yellow flowers, yellow throat Spiraea aruncus (Meadow Sweet). White long spikes	.25
Spiraea astilboides. Flowers white graceful	.25
Spiraea, elegans (Meadow Sweet). A free-flowering pure white, pink anthers	.15
Spiraea filipendula plena. White double flowers	.25
Spiraea Japonica. Pure white flowers	.15 .25
Spiraea palmata. Brilliant crimson flowers	.25
Spirace ulmaria plena. Double white flowers	.25
Spiraea venusta. A showy, red flowering species, fragrant	.15
Stachys lanata. White, silky foliage	.15
Statice, Gmelini (Sea Lavender.) Large panicles of violet-blue flowers	.15
Statice latifolia. Blue flowers on large panicles	.25 .15
Stenanthium, robustum (Feather Fleece). Pure white, fleecy flowers	.50
Stokesia, cyanea (Cornflower Aster). Bearing lavender-blue cornflower-like blossoms	.15
Thalictrum, adiantifolium (Meadow Rue). Foliage fine and white flowers	.25
	.25
Thermopsis, Caroliniana. A showy plant, long spikes, yellow flowers	.25 .15
Thymus, citriodorus (Thyme). Lemon-scented foliage of bushy habit	.15
Thymus serphyllum. Trailing evergreen, pink flowers	.15
Thymus serphyllum album. Trailing evergreen, white flowers	.15
Tradescantia Virginica. Blue flowers	.15
Tricyrtis, hirta (Japanese Toad Lily). Flowers, creamy white; spotted brown	.15 .25
Tricvrtis, macropoda striata. Useful foliage, variegated	.25
Trillium, grandiflorum (Wood Lily). Large white; probably the handsomest	.10
Tritoma, Pfitzerii (The Everblooming Flame Flower). Blooms a rich orange-scarlet	.25
Tritoma, uvaria grandiflora (Red-hot Poker). Flowers rich ochre red	.15 .25
Trollius, Europaeus (Globe Flower). Large, bright yellow, globular flowers	.25
Tunica Saxifraga. Small pink flowers	
Valeriana, officinalis (Valerian) (Hardy Garden Heliotrope). Heads rose-tinted	
white flowers, with strong heliotrope odor	.15
Verbascum Phoeniceum. Red, white and violet flowers	.20 .15
Veronica, Incana. Bright silvery foliage, spikes amethyst-blue flowers	.15
Veronica longifolia subsessilis. Deep rich blue	
Veronica, pectinata. Fine for the rockery; masses of blue flowers in May	.15
Veronica, repens. A useful rock or carpeting plant, with light-blue flowers	.15
Veronica rupestris. Dark blue flowers	.20
Veronica Virginica. Tall spikes of white flowers	.20
Vinca, argentea variegata. Similar to Aurea, silver variegation	.25
Vinca, aurea (Periwinkle). A golden variegated variety	.25
	.10
Vinca minor fl. pl. Double flowers, green foliage	.15
Viola cornuta purpurea. Closely resembles the Princess of Wales Violet	.20 .15
Yucca, filamentosa (Adam's Needle). Spikes of large fragrant creamy flowers	.25
Yucca flaccida. Longer leaves, taller spikes, white flowers	.35
Yucca flaccida auro-striata (Manda). Perfectly hardy Pandanus with golden stripes.	1 00

Specimen Blue Spruce (Picea pungens glauca)
Price, \$2.00 to \$200.00, according to size.

We have the largest stock of specimens

Conifers or Evergreen Resinous Trees

One of the greatest classes of vegetation for outdoor ornamentation. From the loftiest trees, three hundred or more feet in height, to low prostrate shrubs rising barely a foot above the ground. These we consider as the most useful and most ornamental of our hardy trees, and which should be in every garden, either small or large. They can be used as isolated specimens for groups, hedges, windbreaks or shelters.

We have a grand stock of nearly two hundred varieties, in all sizes, from one foot to twenty feet in height, and would be pleased to send a special list of sizes and prices

Abies Concolor (Silver Fir Colorado)—One of the finest American evergreens.

Abies Concolor Violacea (Fir)—Bluer form of above.

Abies Canadensis (Hemlock Spruce)—Medium-sized tree, dark foliage.

Abies Nordmanniana (Nordman Fir)—Majestic, symmetrical form, dark green.

Biota Nana Aurea—Dwarf with fiat golden branches.

Biota Orientalis-Taller than above, with lace-like foliage.

Juniperus Chinensis Albo Spica-Pyramidal, dark blue with white tips.

Juniperus Chinensis Aurea-Golden form of above.

Juniperus Communis Hibernica (Irish Juniper)—Erect, dense outline.

Juniperus Virginiana (Red Cedar)—Varies much in habit and color of foliage. Juniperus Virginiana Glauca—Compact, conical habit with glaucus foliage.

Juniperus Pfitzeriana-Robust growth, dark green foliage, new. Juniperus Japonica Aurea—Dwarf plant with golden foliage.

Juniperus Sabina-Dark green, dwarf.

Juniperus Procumbens-Dwarf, creeping variety, bluish color.

Larix Europaea (European Larch)—Tall growing pyramidal tree, drooping branches. Picea Alba (White Spruce)—Medium height, pyramidal, foliage silvery gray. Picea Alcockiana—Tall, dense habit, foliage pale green, glaucus underneath.

Picea Excelsa (Norway Spruce)—Rapid, lofty growth, pyramidal form, most popular. Picea Excelsa Pendula—Pendulus variety of the Norway Spruce.

Picea Orientalis—Handsome, tall and compact, graceful habit, dark slender foliage.

Picea Polita—Distinct Japanese species. Erect and rigid habit, sharply pointed leaves. Picea Pungens Glauca (Colorado Blue Spruce)-Lofty, pyramidal growth of rich blue color. one of the finest and hardiest conifers.

Picea Pungens Glauca Kosterii—Variety of the above. Finest blue color.

Pincus Austriaca (Austrian Pine)—Rapid growing tree; long, stiff, dark green needles.

Pinus Mugho-Upright spreading, small pine. General form of a bush.

Pinus Strobus (White Pine)—Most ornamental native pine; foliage light green.

Pinus Sylvestris (Scotch Pine)—Tall growing tree, stout, erect shoots, silver green. Retinospora Filifera—Forms a wide cone, with delicate thread-like filaments.

Retinospora Filifera Aurea-Golden form of above, of dwarf growth,

Retinospora Pisifera—Large growing, pyramidal tree from Japan, green feathery.

Retinospora Pisifera Aurea—Golden form of the above.

Retinospora Plumosa—Small growing pyramidal tree, feathery clear green foliage.

Retinospora Plumosa Aurea-Golden variety of the above.

Retinospora Plumosa Sulphurea—Compact form, sulphur yellow color. Retinospora Obtusa—Distinct, dark green of dwarf growth.

Retinospora Obtusa Nana-A curious, Japanese tree; dwarf, irregular growth.

Retinospora Obtusa Gracilis-Upright growth, slender and graceful, light green.

Retinospora Obtusa Cuta Prigni growth, stender and graceful, fight green. Retinospora Obtusa Lutea Nova—Upright growth. The best yellow evergreen. Retinospora Squarrosa Veitchii—Beautiful silvery foliage. Extensively used. Taxus Baccata (English Yew)—Large bush or tree, densely branched, dark green. Taxus Hibernica (Irish Yew)—Erect, resembling a dark green pillar.

Taxus Cuspidata—Dwarf, dark green, beautiful form.

Taxus Brevifolia—Similar to above, but of more upright growth.

Thuya Occidentalis (Arbor Vitae)—Native tree of medium height. Valuable for screens and hedges.

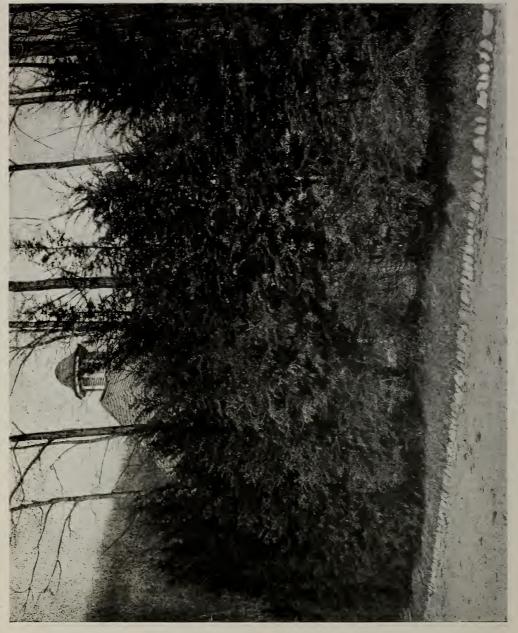

Thuya Occidentalis Geo. Peabody—Golden form of above.

Thuya Occidentalis Compacta—Dwarf compact, deep green foliage.

Thuya Occidentalis Pyramidalis—Upright, compact like the Irish Juniper. Thuya Orientalis—Upright, compact with lace like foliage.

Thuya Orientalis Compacta—Very dwarf form of above.

Plants for Screens

We grow special plants for immediate effect to hide unsightly objects either on your ground or that of your neighbors. Consult us in this matter.

Hardy Roses

Strong two year old plants

Roses, Hybrid Perpetual, 50c. Each.

Alfred Colomb—Bright crimson.

Anna De Diesbach—Rosy pink.

Baroness De Rothschild—Light rose.

Captain Christy—Soft rose.

Frau Karl Druschki—White.

General Jacqueminot—Scarlet crimson.

Gloire De Margottin—Dark red.

John Hopper—Pink.

Mad. Gabrielle Luizet—Rose.
Mabel Morrison—White.
Margareth Dickson—White.
Magna Charta—Bright pink.
Mrs. John Laing—Soft lilac rose.
Paul Neyron—Dark rose, large.
Prince Camille De Rohan—Crimson.
Ulrich Brunner—Reddish cerise.
Victor Verdier—Deep rose carmine.

Tea and Hybrid Tea Roses, 50c. Each.

American Beauty—Bright crimson.

Belle Lyonaise—Deep yellow, changing to salmon.

Bouquet D'or—Deep yellow.

Gloire De Dyon—Fawn with salmon.

Kaiserin Augusta Victoria—Creamy white.

La France—Pink, very floriferous.

Mad. Caroline Testout—Dark pink.

Killarney—Bright pink, fine.

Killarney—White, variety of above.

Souv. De La Malmaison—Flesh color.

Etoile De France—Bright red.

Gruss an Teplitz—Very red.

Safrano—Orange yellow.

Perle Des Jardins—Yellow, fine.

Jonkheer J. L. Mock—Bright red.

Lady Hillingdon—Orange yellow.
General McArthur—Special red.
Lyon Rose—Salmon pink, rare.
Mad. Ravary—Splendid orange yellow.
Le Progress—Bright yellow.
Gustave Regis—Canary Yellow.
Perle of Godesberg—Golden yellow.
George C. Ward—Bright red.
Sunburst—Very fine deep yellow.
Mrs. Aaron Ward—Yellow with pink.
Melody—Yellow, fine, new.
Hadley—Brightest red, fragrant.
Mrs. Geo. Shawyer—Delicate pink.
Mrs. Chas. Russell—Pink American beauty,
very lasting.
My Lady—Seedling from Richmond.

Climbing Roses, 50c. Each; Larger Specimens \$1.00 to \$1.50 Each.

American Pillar—Single, 3 to 4 inches across, pink, with white eye.

Tausendschoen—Pink, changing to carmine, in trusses of 10 to 15 flowers.

White Dorothy Perkins—White, variety of the pink D. P.

Pink Dorothy Perkins—Soft-shell pink, last-

ing.
Crimson Rambler—Large clusters, crimson.
Multiflora—Single, white, very profuse.
Dawson—Pink, single, large.
Daybreak—Single, light itesh-colored.

Debutante—Soft pink, vigorous trailing.
Dr. Van Fleet—Single white, flat trusses.
Excelsa—Bright crimson.
Farquhar—Fine bright pink.
Hiawatha—Deep crimson, shaded white at base.
Lady Gay—Delicate cherry pink.
Silver Moon—Largest single white.
Rosa Wichuraiana (Memorial Rose)—Single white.
Lady Godiva—Soft, pale pink, like Dorothy Perkins in growth.

Hybrid Wichuraiana Roses of My Own Raising and Introduction, 50c. Each; Larger Specimens \$1.00 to \$1.50 Each.

Crimson Roamer—Deep crimson, single.
Evergreen Gem—Yellow buff.
Gardenia—Light yellow, the best.
Gladys Talbot—Dwarf, double pink.
Improved Universal Favorite—Larger and deeper in color than the type.
White Star—Pure white, single.
Jersey Beauty—Light yellow, single.

Manda's Triumph—Pure white, best of its color.

Pink Pearl—Soft pearl pink, fine.

Pink Roamer—Crimson, white center.

South Orange Perfection—Pink.

Universal Favorite—Deep pink, very floriferous.

Various Roses, 50c. Each.

Hermosa—Pink, very floriferous.
Persian Yellow—Deep yellow.
Soleil D'or—Copper yellow, fine.
Harrison Yellow—Bright yellow.
Mad. Norb. Levasseur (Baby Rambler)—
Red, flowers continuously.
Catherine Zeimet—Pure white.

Annie Muller-Bright pink.
Baby Dorothy (Maman Levasseur)-Shell pink.
Rayon D'or-Bright yellow, shaded orange.
Clothilde Soupert-Very floriferous, light pink.

Extra strong pot-grown, three and four year old plants, 75c. to \$1.00 each. Standard Roses, best varieties, fine plants, \$1.00 to \$1.50 each. Roses for greenhouse purpose, special quotation given.

Rose Gardenia (Manda)

(Wichuraiana x Perle des Jardins)

Strong grower, with large green foliage. Flowers produced singly on stems $\frac{1}{2}$ to 1 foot long. When in bud, hardly distinguishable from Perle, bright yellow, and when open cream color, 3 to $3\frac{1}{2}$ inches in diameter, incurving toward evening to perfect imitation of Gardenia as to shape and color, hence its name. Flowers are delightfully fragrant and produce freely. A grand rose for any purpose, 35c. to 75c. each.

We are the pioneer originators and introducers of Hybrid Wichuraiana Roses.

Hardy Vines and Creepers

On account of the habit of this class of plants, they are indispensable for covering posts, trellises, trees, stumps, walls, rocks, or banks; also for screens on piazzas. Besides the luxuriant foliage, they all have showy flowers, which add to their desirability for above purposes.

Each	
Actinidia polygama. Flowers white, scented. One of the best climbers	\$0.50
Akebia quinita. A curious climber, with fine foliage, purple flowers	.35
Ampelopsis quinquifolia (Virginia Creeper). One of the finest vines for covering	
walls, verandas, or trunks of trees	.35
Ampelopsis Veitchii (Boston Ivy). Too well known to need any description	.35
	.00
Aristolochia sipho (Dutchman's Pipe). A rapid climber with large, green foliage and	
pipe-shaped yellowish brown flowers	.75
Bignonia radicans (Trumpet Creeper). Large scarlet flowers	.35
Bignonia radicans grandiflora. Flowers salmon-colored	.50
Celastrus scandens. A native climber, with large, glossy leaves, yellow flowers, pro-	
ducing clusters of orange-capsuled fruit	.35
Clematis coccinea (Virgin's Bower). Flowers scarlet, bell shaped	.35
	.35
Clematis flamula. Flowers small, white, and very fragrant	
Clematis Henryi. Large, creamy white flowers, free grower	.50
Clematis Jackmannii. Large velvety, violet purple flowers	.50
Clematis Madame E. Andre. Flowers bright velvety red, large	.50
Clematis paniculata. A most desirable and beautiful vine, luxuriant grower, profuse	
bloomer, and possessing fine foliage. The flowers are white and fragrant, pro-	
duced in great profusion in late summer	.35
Clematis Virginiana. A profusion of white flowers, followed by fluffy seeds	.35
Climbing Roses. In many varieties. See Roses, page —.	.00
Euonymus radicans. A grand evergreen creeping plant	.25
Euonymus radicans variegata. Fine form with silvery foliage	.25
Jasaminum humile. Evergreen, with yellow flowers in the early spring	.50
Jasminium nudiflorum. Produces multitudes of pale yellow flowers	.50
Hedera Canariensis (Ivy). A well-known evergreen vine, useful for covering walls	
or running up trunks of trees	.25
Lonicera Belgica (Honeysuckle). Blooms all summer. Red and yellow flowers, very	
fragrant	.35
Lonicera flava. A well known native vine, with yellow flowers	.35
Lonicera Halleana. Almost evergreen, white flowers, changing to yellow. Very	.00
	.35
fragrant. The best for general purposes	
Lonicera reticulata aurea. Foliage beautifully netted, or variegated, with yellow	.35
Lonicera sempervirens. Rapid grower, brilliant scarlet flowers	.35
Periploca Graeca (Silk Vine). A beautiful climber, with glossy green foliage and	
purple brown clusters of flowers	.35
Pueraria, Thunbergiana (Dolichos japonicus). Kudzu Vine. A hardy and remarkably	
vigorous vine, frequently producing stems 40 to 60 feet long in a single season.	
Flowers pea-shaped, purple	.50
Wistaria Sinensis. The most elegant and rapid growing of all climbing plants, pro-	
ducing long clusters of blue flowers	.50
Wistaria Sinensis alba. Same as above, flowers are pure white	
Wistonia functions and Same as above, movers are pure white	.50
Wistaria fruticosa. Flowers pale blue, borne in short clusters	.50
Wistaria brachybotrys alba. Shorter growth than above, producing many white	
pendent clusters of flowers	2.00
Pot-grown plants and large sized plants for immediate effect always in stock at	
proportionate prices. From \$1.00 to \$3.00 each.	

We recommend first-class Gardeners or Superintendents to take charge of your grounds and greenhouses, practical and trustworthy men that we know personally; if in need of any, write us with particulars.

American Plants, Seeds and Bulbs

Native collected plants, especially such as Ferns, Orchids, Insectivorous Plants, Water and Bog Plants, Hardy Herbaceous and Alpine Plants, also all the leading varieties of native trees and shrubs.

With our numerous collectors scattered all over this immense country where the flora is so diversified and beautiful, we are in the best position to furnish every variety of Native American Plants at a very reasonable price, considering that we do not send anything but first-class stock that will give results and satisfaction.

Should any one desire lighter or ordinary stock in large quantities, we will be pleased to submit a special figure for this, but strongly recommend to buy nothing but the very

best and selected stock.

Japanese Specialties

We are fortunate after two years of diligent search to receive a grand collection of Japanese plants, most of which have been imported to America for the first time.

To intending purchasers we will be pleased to give further particulars and also special quotations where large quantities of these beautiful plants could be used.

We beg to draw special attention to the following:

Besides these we are expecting other importations, particulars of which we will gladly give

give.

Japanese Iris

A grand collection of fifty choice and rare varieties at 25c., 35c., and 50c., the set of fifty varieties, one of each, for \$12.00, \$17.00 and \$24.00, according to the size of clump.

Japanese Herbaceous Peonies

In twenty-five new, single and semi-double varieties. Price \$1.00 each, set of twenty-five varieties, one of each, for \$24.00.

Japanese Tree Peonies

The grandest and most complete collection ever imported. All shades, colors from pure white to scarlet, with flowers measuring from six inches to one foot in diameter. Price \$2.00 each, set of fifty varieties, one of each, for \$90.00.

Japan Lilies

New Dahlia, Minnie Burgess (Best Scarlet Dahlia)

One of the Prize Winners of 1915 and 1916

Dahlias

These flowers which had the attention of Horticulturists 30 and 50 years ago, have come back again, and are the favorites of to-day. Not only have the flowers been improved in various ways, but many new types have been created, so that now we have Dahlias to suit all tastes and requirements. They are of easy culture and suitable for a 25-foot front as well as for an estate of 250 acres.

When placing an order for Dahlias, be sure and include our Novelties which you find described and illustrated on the front pages of this Catalogue.

The Best Dahlias of all. Manda's Introduction. See front of this book.

Vince major vericate Tight group white marging	.50

Exchanges and Purchases

Notwithstanding that our collection of plants of all classes is very large, we are always ready to hear or enter into correspondence with parties for either any new or rare plants for sale or exchange for other stock. We will trade liberally with anyone having overgrown large species or new useful horticultural plants or having accumulated a large stock of every-day greenhouse or garden plants who wish to dispose of or exchange for some choice or rare varieties to add to their collection. We would also be pleased to enter into correspondence with any gentleman intending to travel in countries that have not been much explored, where there would be a chance for discovering and adding some new and rare species of plants. In each case we would thank the intending correspondent to state everything plainly and give full details and information so as to enable us to act decisively and promptly.

On receiving such information, it should be preferably addressed to the main office, South Orange, N. J., U. S. A.

All Fertilizers supplied. Sheep Manure, \$2.00 per bag. Insecticides and Horticultural Requisites supplied at standard prices.

Greenhouse Flowering Plants

This useful class comprises both dwarf and climbing kinds. Only such are listed as have been found to be the best and most popular varieties. We will be pleased to quote prices on any others not listed, or for large specimens.

quote prices on any others not listed, or for large specimens.

Stratagem—Straw bronze and yellow.
Sunshine—Bright golden vellow.
Tennyson—Pure yellow. For cut flowers.
Yellow Gem—Golden yellow.

One of Our Orchid Houses at South Orange, N. J.

Orchids

These are undoubtedly the coming flowers, and every greenhouse or conservatory should have at least a few of these floral gems. They are of easy culture, and will grow in any ordinary greenhouse or conservatory, together with other common plants, such as Geraniums, Fuchsias, etc. Most of the varieties can be grown in baskets or on blocks, and suspended from the roof, thus not utilizing any bench room. Orchids, when in bloom and kept in cool places, will last from four to ten weeks in perfection, so that any one having a small collection of Orchids will have some plants in bloom all the year round. Amateurs intending starting to grow Orchids should write for list of such varieties as are best suitable for beginners. The following are a few cultural points: Orchids require a season of growth and a season of rest, corresponding with the wet and dry seasons of their native country. When they are making new growths, they should receive a liberal supply of water until the maximum is reached, when the new bulb is nearly full size; then it should receive just enough water to keep the bulb from shriveling; as soon as it shows the sign of bloom, water it again until it has done flowering.

The prices quoted are for nice, thrifty, flowering size plants. Prices and sizes of various specimens will be cheerfully given to intending purchasers on application. Com-

plete list of other Orchids on application.

CATTLEYA.

The Cattlevas are among the most beautiful of the whole Orchid family.

The Catcheyas are among the most seauthar of the whole Croma family.	Each
Aurea. Yellow and crimson, rare species from Colombia

Unguioulatum. Yellow and brown flowers on long stems	2.00
Varicosum. Large yellow flowers, arching spikes	2.00 2.00 1.00

The above illustration shows the transportation of orchids from their native homes. After risking their lives in collecting same, the collectors have to cut down trees, saw out boards by hand, make boxes into which the plants are packed; and then, transported on the backs of men or animals sometimes hundreds of miles before reaching the coast where they are shipped to New York, reaching South Orange, from where they are reshipped all over the country either in their dormant condition or after they have been established.

Cacti and Succulents

These quaint and curious plants, while not generally grown, have a great many admirers, and to anyone making a collection we will be pleased to furnish a full list of such kinds as we grow or can furnish.

If you wish to begin a collection, we will be pleased to furnish you with 6 plants in 6 varieties for \$2.50, or 12 plants in twelve varieties for \$4.50, our selection.

Furnishing and Building of New Conservatories and Greenhouses

This is one of our specialties, being better equipped than any other firm in the United States for that purpose. We would, therefore, advise parties that contemplate the building of any new conservatories or greenhouses, to correspond with us, as we may be able to give them some useful advice regarding the proper construction of the buildings that would be practical for plant-growing.

When ready to furnish a conservatory or greenhouse of any kind with Palms, Fern Trees, Ferns, Foliage or Flowering Plants, Orchids, Gardenias, Roses, Carnations or Chrysanthemums, please communicate with us, and we will make you a specification and estimate and furnish plants that will give you a satisfactory result at a very moderate cost.

Exchanges and Purchases

Notwithstanding that our collection of plants of all classes is very large, we are always ready to hear or enter into correspondence with parties for either any new or rare plants for sale or for exchange for other stock; also anyone having overgrown large species or new useful horticultural plants or having accumulated a large stock of every-day greenhouse or garden plants who wishes to dispose or exchange for some choice or rare varieties to add to their collection with whom we will trade liberally. We would also be pleased to enter into correspondence with any gentleman intending to travel in countries that have not been much explored, where there would be a chance for discovering and adding some new and rare species of plants. In each case we would thank the intending correspondent to state everything plainly and give full details and information so as to enable us to act decisively and promptly.

On receiving such information, it should be preferably addressed to the main office, South Orange, N. J., U. S. A.

We expect during the year large importations of the following leading kinds of Orchids beside many others of which we would be pleased to give full particulars to any one interested on application. The following prices are for first-class stock in good healthy condition. Cattleya Trianae, C. Mossiae, C. Percivaliana, C. Harrisoniae, C. Skinnerii, Dendrobium Formosum giganteum. Oncidium, Rogersii.

Formosum giganteum, Oncidium, Rogersii.

Palms

In the whole vegetable kingdom there is no family of plants so graceful, attractive, and one that deserves to be so generally cultivated, as palms. Most kinds are invaluable for decorative purposes and house culture.

			Each
Areca Baurei. Hardy, cool plant, quick grower			\$3.00
Areca lutescens. Bushy and decorative, very useful			3.00
Areca rubra. Striking species for warm house	1.00	to	5.00
Areca sapida. Cool and hardy palm			3.00
Areca Verschaffeltii. Very ornamental, striking plant	2.00	to	5.00
Atalea mariposa. Rare and noble plant. Price on application			
Brahea edulis. Cool, hardy variety			3.00
Brahea filamentosa. Ornamental species, very hardy	1.00	to	3.00
Brahea glauca. Bluish foliage, rare, for cool house	3.00	to	5.00
Chamaedorea Pringellii. Rare species of dwarf growth			5.00
Caryota urens. "Fish Tail Palm," characteristic			3.00
Cocos Bonnettii. Fine, graceful hardy plant			3.00
Cocos plumosa. Tall, feathery, graceful palm			2.00
Cocos Weddelliana. Very graceful, useful small palm			5.00
Cocos Romansoffiana. Tall growing kind			3.00
Chamaerops elegans. Very hardy, tall growing		to	2.00
Chamaerops humilis. Dwarf, hardy plant		to	2.00
Chamaerops Fortunii. Compact, useful palm, very hardy			2.00
Corypha Australis. Very decorative			2.00
Corypha gebanga. Rarely cultivated, fine plant			5.00
Erythea edulis. Very hardy variety			3.00
Euterpe edulis. Fine, graceful arching fronds			2.00
Geonoma elegans robusta. Beautiful and rare plant			3.00
Geonoma gracilis. Very ornamental, like Cocos			1.00
Geonoma imperialis. Graceful variety, dwarf growth			
Geonoma princeps. Distinct species			3.00
Geonoma Schottiana. Fine, imposing plant			
Kentia Belmoreana. The most useful palm for decoration			5.00
Kentia Canterburyana. Larger foliage, rare species			5.00
Kentia Fosteriana. Tall and graceful, hardy and useful			
Kentia McArthurii. Distinct species	2.00	to	5.00

KENTIA IN VARIETY.

We have over thirty distinct varieties of Kentia in mostly unique plants from two to eight feet high, and would be pleased to make special offer of same to any one interested in Palms.

\mathbf{E}	lach
Latania borbonica. Very useful palm, quick grower\$0.50 to \$	5.00
Latania rubra. Choice and rare variety	5.00
Licuala grandis. A noble species, large, broad leaves. Price on application.	
Livistonia rotundifolia. Dwarf and handsome	5.00
Livistonia peltata. Fine species, shiny, broad leaves	3.00
Oreodoxia regia. The royal palm, tall and graceful	2.00
Phoenix reclinata. Useful, decorative plant, hardy 1.00 to	5.00
Phoenix pumila. Compact species, rare. Price on application	
Phoenix Canariensis. Handsome variety, useful for decoration 1.00 to	5.00
Phoenix dactylifera. The date palm	2.00
	5.00
	5.00
	5.00
	1.00
	5.00
	1.00
Seaforthia elegans. Quick growing palm, graceful	2.00

Many other varieties. Also large specimens. Prices on application.

We have a large stock from seedlings up to large specimens 20 feet high. Visit our tropical forest.

FERNS.

Besides these varieties we have a large lot of specimens and half specimens. Prices
of same will be furnished on application.
Adiantum capellus veneris. A dwarf variety\$0.25
Adiantum capellus veneris imbricatum (Hardy Farleyense)
Adiantum cardiochlaena. Large growing. Fine for specimens. 1.00
Adiantum cuneatum. The well known Maiden Hair Fern
Adiantum dolabriforme. Fine for hanging baskets. 1.00
Adjantum Farleyense. The finest of all this class. 1.00
Adiantum gracillimum. Very fine foliage, long fronds
Adiantum grandiceps. Fronds crested on the end
Adiantum monochlamys. A dwarf variety from Japan. 1.50
Adiantum O'Brienii. A very hardy variety; one of the best
A 19 4 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
Adjustum Venustum. A delicate leaved, pretty variety
Adiantum Williamsii, The golden Maiden Hair
Angiopteris evecta. Enormous dark green fronds
Aspidium amabile. Dark green heavy fronds
Aspidium capense. A beautiful hardy variety
Aspidium tensuimense. A dwarf dense sort; very hardy
Aspidium viridescens. Fine arching fronds. Japanese variety 1.50
Asplenium bulbiferum. Beautiful arching fronds
Asplenium nidus avis (Bird's Nest Fern)
Blechnum occidentale. Dwarf, hardy variety
Cyrtomium falcatum (Holly Fern). Glossy green foliage
Cyrtomium caryotaedium. More dwarf than the above
Davallia bullata. Japanese design fern
Davallia elegans. Long, arching fronds
Davallia Fijiensis plumosa. Arching, feathery fronds
Davallia platyphilla. An elegant variety
Davallia Mooreana, Long, lacy, arching fronds
Gonophlaebium subariculatum. Long drooping fronds; fine 1.50
Lygodium scandens. The climbing fern
Microlepia hirta cristata. Crested, light green fronds
Nephrolepis Bauseii. Upright crested fronds
Nephrolepis exaltata. Grand, arching fronds
Nephrolepis exaltata Bostoniensis (Boston Fern)
Nephrolepis exaltata Piersonii (Pierson Fern)
Nephrolepis exaltata Anna Foster (Foster Fern)
Nephrolepis davalloides furcans. Fine crested plant
Nephrolepis Philippinense. Long, narrow fronds
Nephrolepis tuberosa. Upright, arching leaves
Nephrolepis tuberosa plumosa. Fringed variety of the above five
NEPHROLEPIS.
The varieties of this fern have multiplied so of late that we now have fifty-four
different varieties which we would be pleased to supply from 25 to 50c each, list of
which could be had on application.
Onychium Japonicum. A fine fronded dense variety\$0.25
Platycerium alcicorne (Stag Horn Fern)
Platycerium alcicorne (Stag Horn Fern)
riatycerium aicicorne majus. A line form of the above

which could be had on application.	Each

Greenhouse Vines, Climbers and Creepers

For training to the rafters of the greenhouse, for covering the end walls, planting among rockwork, or for hanging along the edges of benches, this class of plants have their use in the greenhouse. The majority of these produce rare and handsome flowers which brighten the greenhouse or are found useful for cut flowers.

	Each
Allamanda Hendersonii. Strong grower, large yellow flowers	\$0.50
Allamanda Williamsii. Forms compact bush. Flowers yellow	50
Aristolochia elegans. A rapid grower, with creamy and purple flowers	50
Asparagus decumbens. Lace-like climber, or drooping vine	50
Asparagus plumosus. Feathery, graceful green foliage	50
Asparagus retroflexus. Semi-climbing, bright green	
Asparagus Sprengerii. Foliage bright glossy green	.35
Asparagus tenuissimus. Fluffy, delicate foliage	.25
Bignona venusta. Rapid grower, with coral red flowers	
Bougainvillea glabra Sanderiana. Strong and rapid grower	.50
Bougainvillea Harrisii. A beautiful silvery variety form	.50
Cissus discolor. Mottled and marbled crimson and green foliage	25

Seeds

This important department has our careful attention, knowing the necessity of pure, good, and true seed. Instead of giving showy and highly colored packets, we will endeavor to put all that unnecessary expense into the seed, the article that the customer wishes to procure. It should never be the question with the buyer, "How cheap can I buy my seeds?" but "Where can I procure the very best of seeds?" A penny saved in the first instance may bring not only failure and disappointment, but labor wasted and a whole season lost.

CHOICE VEGETABLE SEEDS

Grass and Clover Seeds

We beg to draw the special attention of our patrons to the Universal Lawn Grass Seed Mixture, which is prepared to give the best results for fine lawns; also to the cheap Pasture Grass Mixture for meadows. We would also be happy to supply grass and clover seed

MANDA'S UNIVERSAL LAWN SEED MIXTURE

This lawn grass mixture is composed entirely of the finest quality of fine-leaved dwarfgrowing grasses, in such proportions as will enable it to withstand the extreme heat of our summers. The grasses which compose this mixture are extra well cleaned, so that all weeds are excluded, leaving nothing but the pure, clean seed.

We recommend four bushels to the acre. It is necessary to sow the seed very thickly

we recommend four bushels to the acre. It is necessary to sow the seed very thickly to get the most pleasing result—that is, a good lawn.

The best time to sow grass seed is in the spring or about the latter part of August. We prefer the spring. The success of establishing a good lawn depends much on the season and the condition of the ground at the time of sowing. A light raking in will protect the seeds greatly. Rolling, however, is at all times indispensable, and should any weeds appear, they should be eradicated.

MANDA'S UNIVERSAL MIXTURE IS AS GOOD AS ANY AND BE	ETTER	THAN	MANY
	Qt.	Pkt.	Bush.

GRASS AND CLOVER, ALSO CEREALS AND AGRICULTURAL SEEDS

We keep a complete list of the finest varieties of these seeds, unequaled for purity and cleanliness

Parties desiring large quantities would do well to get quotations from us before ordering elsewhere.

PALM SEEDS.

Having to plant thousands of them ourselves every season, we are compelled to make large importations of these seeds yearly. They come from all quarters of the tropical world, such as New Zealand, Australia, the East and West Indies, South America, and Africa. Orders are booked beforehand, and will be filled in succession as the goods arrive. The seed is unexcelled as regards purity and germination.

EVERGREEN AND DECIDUOUS TREE AND SHRUB SEEDS.

expense involved in securing these seeds, we will not offer quantities in less bulk than will cost 25 cents and upwards.

Cardinal. Newton. Stanwick Elruge. Early Rivers. Spencer. Victoria

Prices, \$3.00, \$5.00, to \$7.50 each.

Figs. Pot Crown in Best Variety \$2.50 to \$7.50 each.

Imported Pyramidal or Fan Shaped trained fruit trees for outdoor planting. Apples
Pears, Peaches, Cherries, etc., fine, strong specimens for immediate effects. \$3.50 to \$7.50 each.

Press Notices

THE following are a few of the thousands of Press Notices received during the last thirty years.

FROM "THE REPUBLICAN."

"The Floral King"

Most of us know that Rothschild is the king in money circles; that the Vanderbilts are railroad monarchs; that the Astors are property peers; that Wanamaker is the highest type of merchant; that Depew is the greatest wit and orator in this land. Every niche allotted to fame of one kind or another has some special person fitted to adorn it. There can be but one leader in every trade, profession or vocation. And so it is that W. A. Manda, of the Universal Nurseries, of South Orange, N. J., by his perfect scientific skill; by his patient, ceaseless study; by a faithful, enduring effort to keep always advancing his investigations, has become recognized as the "Floral King." Mr. Manda is undoubtedly the most progressive and successful propagator of plants, shrubs and floral treasures of any expert botanist of the times. He is like Edison, the wizard of the electrical world, constantly springing delightful surprises by the wonderful things he accomplishes in bringing new and novel effects from floriculture and botanical subjects. grandest result is that Mr. Manda's work has brought no end of fascinating and enduring specimens to the market as well as to the rich man's conservatories. Mr. Manda is the highest authority on the true culture of flowers, shrubs, vines, roses, etc., of the age. But it does not prove costly for anyone to learn all about the outcome of his rare and wonderful powers with transforming plant-life into novelties and new colors, forms and beauties in the floral world. He makes all these rare features so cheap that anyone who loves flowers can have in their yards some entirely new plant or shrub, or the oldfashioned ones so improved that they are scarcely recognized, or will be the admiration of the neighbors. It is only necessary to send to the Universal Nurseries, at South Orange, N. J., and a Catalogue describing all these lovely plants, flowers, vines or shrubs will be mailed, and then the finest array in the country can be selected from in either seeds, plants, bulbs, etc.

FROM "BOSTON TRAVELER," JUNE 26,1886 (30 YEARS AGO).

A Wild Garden

Where a Modest Phase of Horticulture Has Found a Home.

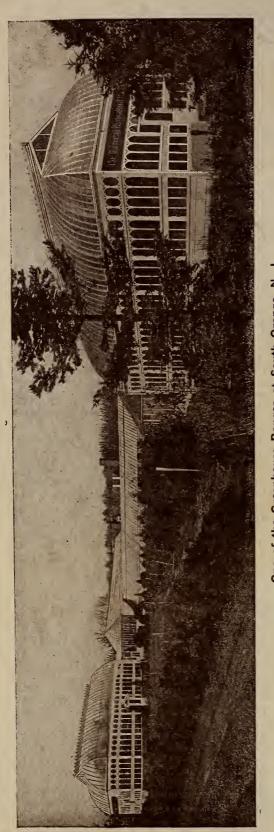

The introduction of a wild garden in the Botanic Gardens at Cambridge by the superintendent, Mr. W. A. Manda, in an area of three-fourths of an acre, on a rising hillock, has proved a most marked success, and the labor bestowed has also produced a most charming effect. The flowers are arranged in masses. One of these, the Pentstemon, is like a foxglove, etc.

FROM "THE DAILY CHRONICLE," LONDON, ENGLAND, MAY 23, 1912.

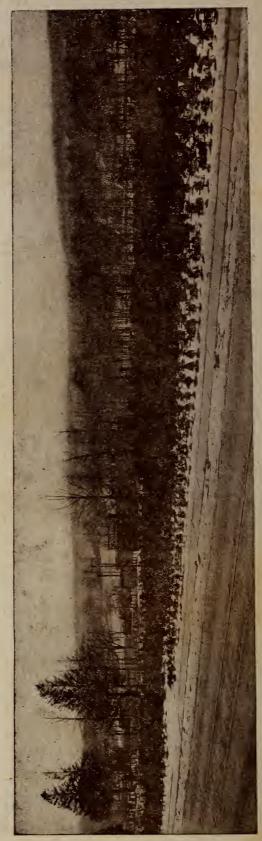

"One of the most striking points in the judging was the numerous successes won by Mr. W. A. Manda, of South Orange, N. J., who brought over collections of palms, as big as beautiful, and a number of other things calculated to appeal chiefly, perhaps, to men with deep pockets and women with ambitions. No more effective designs in greenery have been staged in this country than those created at Chelsea by this go-ahead American."
